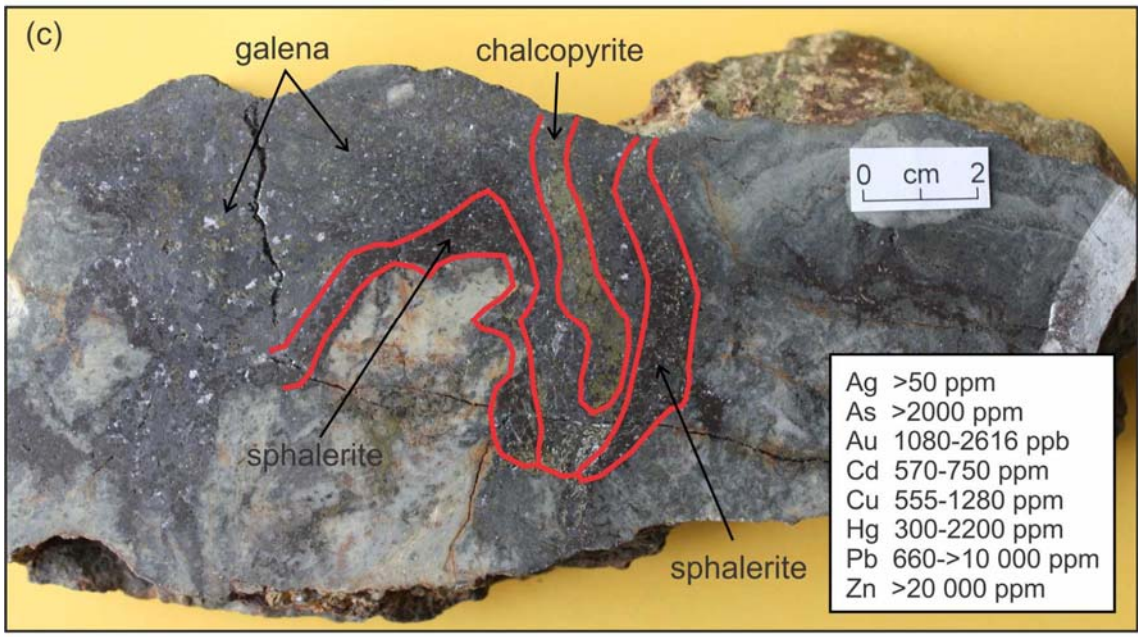
GEOSCIENCE AND MINES BRANCH

Report of Activities 2014



Report ME 2015-001

Eds. E. W. MacDonald and D. R. MacDonald

NOVA SCOTIA

Halifax, Nova Scotia

December 2015

Cover photo

Cut slab of a mineralized sample from dump material at Galena Mine, near Cheticamp, Inverness County. The photo shows folded layers of sphalerite, chalcopyrite and galena. Assay concentrations are from samples collected in and around the Galena Mine showing. The rock sample was collected by Garth DeMont; photo by Chris White. For more information, please read the paper on pages 103-117.

Editing and Layout: E. W. MacDonald and D. R. MacDonald

Publications can be obtained through the Geoscience and Mines Branch's online NovaScan database or through the Department of Natural Resources Library. NovaScan (https://gesner.novascotia.ca/novascan/DocumentQuery.faces) can be searched by title, author, document type and document number. Click on the blue 'More' button to get the full document record, and then click on the green 'Free Download' button to view or download the publication. For more information or assistance, contact the Department of Natural Resources Library:
