

Keep Vaccine Safe

- Store only vaccine in refrigerator
- Stock vaccine on a first-in is the first-used basis
- Store full bottles of water on empty shelves and on the door
- Never leave vaccine outside the refrigerator
- Stock only a one month supply

- Check and log temperature twice a day
- Keep vaccine between 2°-8°C
- Don't store vaccine on the door shelves
- Open the door only when necessary
- In the event of a fridge failure or vaccine spoilage call a public health office
