

# RESPIRATORY WATCH

Week 12 (March 17, 2019 to March 23, 2019)\*

## IN SUMMARY...

## Activity levels\*\*

- Western, Northern, and Central Zones have localized activity. Eastern Zone has sporadic activity.
- There are 6 influenza outbreaks being reported this week and no schools reported an increased absenteeism rate.

## Laboratory-confirmed cases\*\*\*

- There were 48 influenza A and 3 influenza B cases reported this week. There have been 581 laboratory confirmed cases of Influenza A and 10 laboratory confirmed cases of Influenza B reported during the 2018-2019 influenza season.
- Positive test results were received for Enterovirus, Metapneumovirus, Parainfluenza, Rhinovirus and RSV.

#### Severity

• There have been 52 ICU admissions in adults and 5 ICU admission in children (age group 0-19 years). There have been 32 deaths\*\*\* of laboratory confirmed influenza during the 2018-2019 influenza season. All deaths have been in adults.

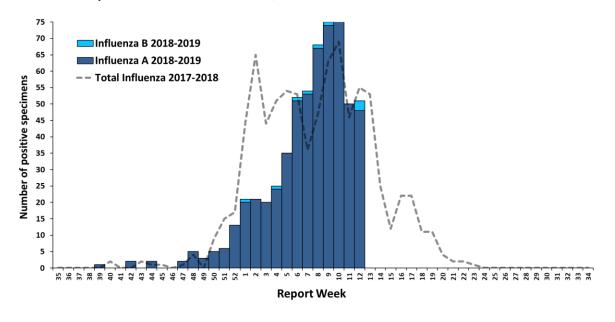

## Syndromic surveillance

- The average ILI rate for Nova Scotia during this reporting period was 1.5.
- 90.0% of emergency rooms reported ILI data during this reporting period. Buchanan Memorial, Cape Breton Regional, New Waterford Consolidated, and St Anne's did not report this week.

Notes: \*Reporting weeks run from Sunday to Saturday. The 2018-2019 influenza season is defined using PHAC's influenza surveillance weeks. This year runs from August 26, 2018 (Week 35) to August 28, 2019 (Week 34);

#### **LABORATORY-CONFIRMED INFLUENZA CASES**

Figure 1: Number of laboratory confirmed influenza cases by report week, 2018-2019 season, with trend-line comparison to 2017-2018 season, Nova Scotia

<sup>\*\*</sup>Activity level data is obtained from CNPHI, see appendix for definitions;

<sup>\*\*\*</sup>Deaths include individuals with a positive influenza test result, influenza may not have been the major contributing cause of death or hospitalization.

Table 1: Number of laboratory-confirmed influenza cases by zone, current week and cumulative 2018-2019 season in Nova Scotia

| ZONE              | CURRENT WEEK |             |             | CUMULATIVE 2018-2019 |             |             |
|-------------------|--------------|-------------|-------------|----------------------|-------------|-------------|
| ZONE              | TOTAL        | INFLUENZA A | INFLUENZA B | TOTAL                | INFLUENZA A | INFLUENZA B |
| Western           | 7            | 7           | 0           | 108                  | 108         | 0           |
| Northern          | 13           | 12          | 1           | 104                  | 103         | 1           |
| Eastern           | 7            | 7           | 0           | 103                  | 102         | 1           |
| Central           | 24           | 22          | 2           | 276                  | 268         | 8           |
| Nova Scotia Total | 51           | 48          | 3           | 591                  | 581         | 10          |

Table 3: Hospitalizations, ICU admissions and deaths for influenza positive patients, current week and cumulative, 2018-2019 season. Nova Scotia

| ·                  | CURRENT WEEK |             |             | CUMULATIVE 2018-2019 |             |             |
|--------------------|--------------|-------------|-------------|----------------------|-------------|-------------|
|                    | TOTAL        | INFLUENZA A | INFLUENZA B | TOTAL                | INFLUENZA A | INFLUENZA B |
| Hospitalized       | 17           | 15          | 2           | 277                  | 272         | 5           |
| Hospitalized - ICU | 0            | 0           | 0           | 57                   | 57          | 0           |
| Deceased*          | 2            | 2           | 0           | 32                   | 31          | 1           |
| Nova Scotia Total  | 19           | 17          | 2           | 366                  | 360         | 6           |

<sup>\*</sup>Deaths include individuals with a positive influenza test result, influenza may not have been the major contributing cause of death or hospitalization.

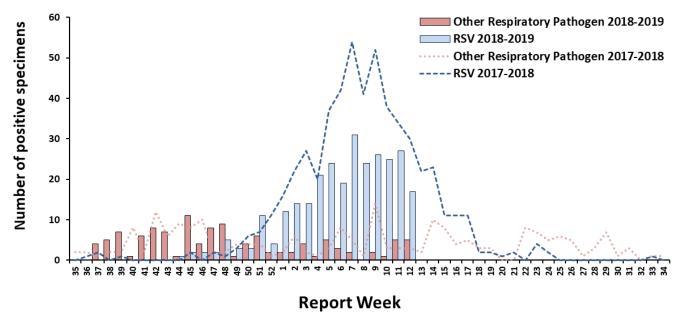

## **SYNDROMIC SURVEILLANCE**

Figure 2: Percentage of emergency room visits due to ILI by report week, 2018-2019 season, with trend-line comparison to 2017-2018 season, Nova Scotia

## **OTHER RESPIRATORY PATHOGENS**

Figure 3: Number of positive specimens tested for other respiratory pathogens\* and RSV by report week, 2018-2019 season, with trend-line comparison to 2017-2018 season, Nova Scotia

<sup>\*</sup> Other respiratory pathogen includes Adenovirus, Bocavirus, Chlamydophila pneumonia, Coronovirus, Enterovirus, Metapneumovirus, Mycoplasma pneumoniae, Parainfluenza, Pertussis, Rhinovirus.

Note that data for this figure is obtained from provincial laboratories.

Table 4: Number of positive RSV specimens by age group, 2018-2019 season, Nova Scotia

| AGE GROUP         | 2018-2019 |
|-------------------|-----------|
| 0-5 months        | 79        |
| 6-11 months       | 25        |
| 12-23 months      | 39        |
| 2-5 years         | 44        |
| 6-15 years        | 10        |
| 16-65 years       | 31        |
| 65+ years         | 59        |
| Nova Scotia Total | 287       |

Table 5: Number of positive specimens tested for other respiratory pathogens, current report week and cumulative season, Nova Scotia, 2018–2019

| Pathogen                    | CURRENT WEEK (n positive) | <b>CUMULATIVE 2018-2019</b> |
|-----------------------------|---------------------------|-----------------------------|
| Adenovirus                  | 0                         | 0                           |
| Bocavirus                   | 0                         | 0                           |
| Chlamydophila pneumoniae    | 0                         | 4                           |
| Coronavirus                 | 0                         | 9                           |
| Enterovirus                 | 1                         | 1                           |
| Metapneumovirus             | 1                         | 6                           |
| Mycoplasma pneumoniae       | 0                         | 16                          |
| Parainfluenza               | 2                         | 18                          |
| Pertussis                   | 0                         | 3                           |
| Respiratory Syncytial Virus | 17                        | 287                         |
| Rhinovirus                  | 1                         | 59                          |

#### APPENDIX: DEFINITIONS USED IN INFLUENZA SURVEILLANCE, AND USEFUL LINKS, 2018-2019

#### **ACRONYM LIST**

**CNPHI** Canadian Network for Public Health Intelligence

ICU Intensive care unitILI Influenza-like illnessRSV Respiratory syncytial virus

## **ILI CASE DEFINITION**

Acute onset of respiratory illness with fever and cough and with one or more of the following – sore throat, arthralgia, myalgia or prostration which is likely due to influenza. In children under 5, gastrointestinal symptoms may also be present. In patients under 5 or 65 and older, fever may not be prominent.

#### NATIONAL FLUWATCH DEFINITIONS FOR INFLUENZA ACTIVITY LEVELS

| No activity | No laboratory-confirmed influenza detections in the reporting week, however,        |  |  |  |
|-------------|---|--|--|--|
|             | sporadically occurring ILI* may be reported   |  |  |  |
| Sporadic    | Sporadically occurring ILI* and lab confirmed influenza detection(s) with <b>no</b> |  |  |  |
|             | outbreaks detected within the influenza surveillance region                         |  |  |  |
| Localized   | (1) Evidence of increased ILI* and  |  |  |  |
|             | (2) lab confirmed influenza detection(s) together with                              |  |  |  |
|             | (3) outbreaks occurring in schools, hospitals, residential institutions and/or      |  |  |  |
|             | other types of facilities occurring in less than 50% of the influenza               |  |  |  |
|             | surveillance region   |  |  |  |
| Widespread  | (1) Evidence of increased ILI* and  |  |  |  |
|             | (2) lab confirmed influenza detection(s) together with                              |  |  |  |
|             | (3) outbreaks occurring in schools, hospitals, residential institutions and/or      |  |  |  |
|             | other types of facilities occurring in greater than or equal to 50% of the          |  |  |  |
|             | influenza surveillance region   |  |  |  |
