

ANNUAL REPORT
for the year 2012-13

**The Nova Scotia
Crop and Livestock
Insurance Commission**

Canada 

Growing Forward 
A federal-provincial-territorial initiative

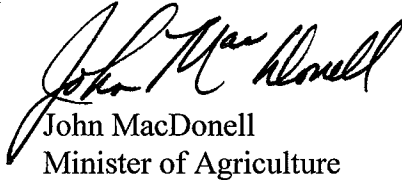

NOVA SCOTIA

His Honour
Brigadier-General The Honourable J.J. Grant
Lieutenant-Governor of Nova Scotia

Dear Sir:

I have the honour to transmit herewith the Annual Report of the Nova Scotia Crop and Livestock Insurance Commission for the year ended March 31, 2013.

I am, Your Honour,
Yours very truly,

John MacDonell
Minister of Agriculture

The Honourable John MacDonell
Minister of Agriculture

Dear Sir:

We have the honour to herewith submit the fortieth Annual Report of the Nova Scotia Crop and Livestock Insurance Commission for the fiscal year ending March 31, 2013. Included in this report is a summary of operations, the audited financial statements, and statistical information for the programs under the authority of the Commission.

Respectfully submitted,
Nova Scotia Crop and Livestock
Insurance Commission

A. Bentley
Chair

B. MacLeod
CEO

G. Thyssen

PROGRAM BACKGROUND

The Nova Scotia Crop Insurance Act, which was assented to in 1968 and amended in 1978 and in 2005 to provide for the administration of the Livestock Insurance program, is cited as the Crop and Livestock Insurance Act.

Under the Crop and Livestock Insurance Act, the Commission is responsible to administer the program under the direction, supervision, and control of the Minister of Agriculture.

The Commission administers crop insurance coverage to 14 crop insurance plans and a dairy and poultry livestock insurance program.

Since 2008 the Commission administered the Canada/Nova Scotia Wildlife Compensation Program.

OBJECTIVES AND RESPONSIBILITIES

The fundamental objective of the Crop and Livestock Insurance Commission is to make available to Nova Scotia farmers insurance-based programs that will assist in years of reduced yields, lower revenue, and losses due to insurable perils.

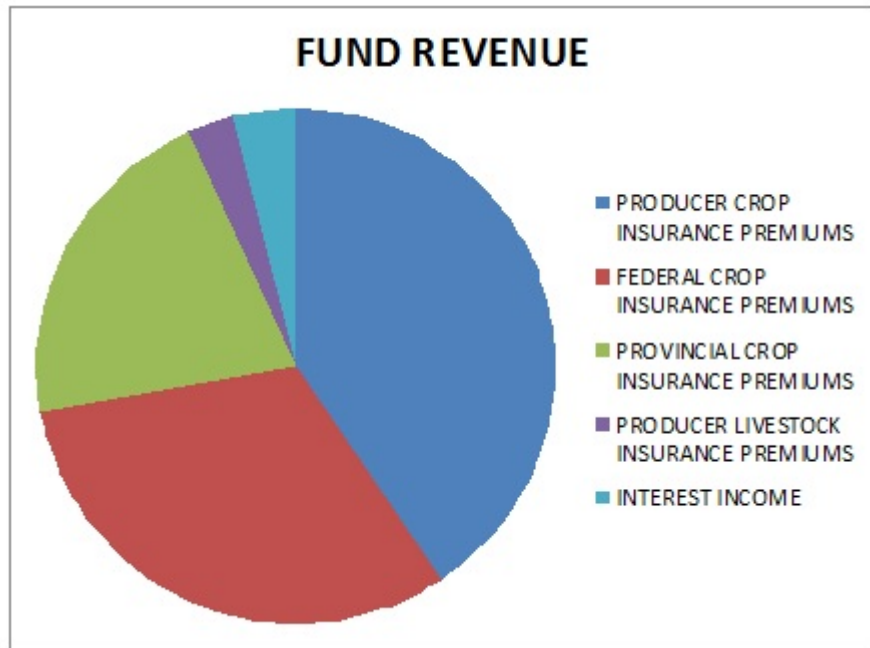

In the interest of efficiency of operations and convenience to farmers, the programs are administered by a common staff, but each program stands on its own. Separate accounting for premium and indemnities is maintained for each program. Administration expenses are proportioned to each program.

FINANCIAL PARTICIPATION

The administration of the Crop and Livestock Insurance program is the responsibility of the Commission. It is subject to the provisions under the Canada-Nova Scotia Bilateral Growing Forward Agreement. Crop and Livestock Insurance in Nova Scotia is delivered under the authority of the Crop and Livestock Insurance Act.

The governments of Nova Scotia and Canada each contribute a percentage of administration expenses for crop insurance and wildlife compensation. Administration expenses for other programs administered by the Commission are the responsibility of the Province.

For 2012-2013, the government of Nova Scotia contributed approximately 40 per cent of the total administration costs and 24 per cent of the crop insurance premium. The Government of Canada contributed 60 per cent of the total administration costs and 36 per cent of the premium for crop insurance programs.

INSURANCE PLANS IN FORCE

Spring Grain	-	oats, barley, wheat, and mixed grain
Winter Grain	-	rye, wheat, triticale
Tree Fruit	-	apples, pears, peaches
Tree Insurance	-	apples, pears
Corn	-	silage, grain, high moisture
Blueberries	-	lowbush and highbush blueberries
Strawberries	-	June Bearing, Day Neutral
Raspberries	-	
Forage	-	establishment year
Soybeans	-	soybeans, canola, sunflowers
Potatoes	-	processing, seed, table
Vegetables	-	broccoli, brussels sprouts, cauliflower, cabbage, fresh carrots, lettuce, onions, parsnips, processing carrots, rutabagas and winter squash
Weather Derivative	-	
Maple	-	
Dairy	-	dairy cows, heifers and calves; loss of income benefit
Poultry	-	broilers, pullets, layers, breeders

FEATURES OF THE CROP INSURANCE PLANS

Designated Perils

The crop insurance plans protect against loss caused by drought, frost, hail, wind, excessive moisture, insect infestation, plant disease, wildlife, winter injury, unavoidable pollination failure, and off-crop due to adverse weather conditions.

Type of Insurance

For yield based plans, each insured crop is guaranteed a specific yield based upon the past yield records of each insured. When no past records are available, a bench mark, either provincial or industry averages, is used.

For non-yield based plans (weather) the guarantee is based on other specific measureables, such as total precipitation (or lack of) for a specified area which is known to result in a loss of crop production or quality.

Quality Guarantee

Quality losses are taken into consideration with certain plans such as tree fruit, corn, and spring and winter grain as well as weather.

Premium Discount/Surcharge

The base premium rate for all insurance plans, with the exception of forage, tree endorsement, and poultry, is adjusted by giving a discount when indemnities paid are less than premium paid or by adding a surcharge when indemnities paid exceed premium. The maximum discount shall be 50% and the maximum surcharge shall be 100%.

Other Programs:

The Nova Scotia Crop and Livestock Insurance Commission administers a compensation program to Nova Scotia farmers for losses to specified crops or livestock as a direct result of the activities of wildlife. There is no requirement for producers to be enrolled in Crop Insurance to obtain a compensation payment. The Province of Nova Scotia and the Government of Canada contribute 40% and 60% respectively for the cost for administration and compensation payments.

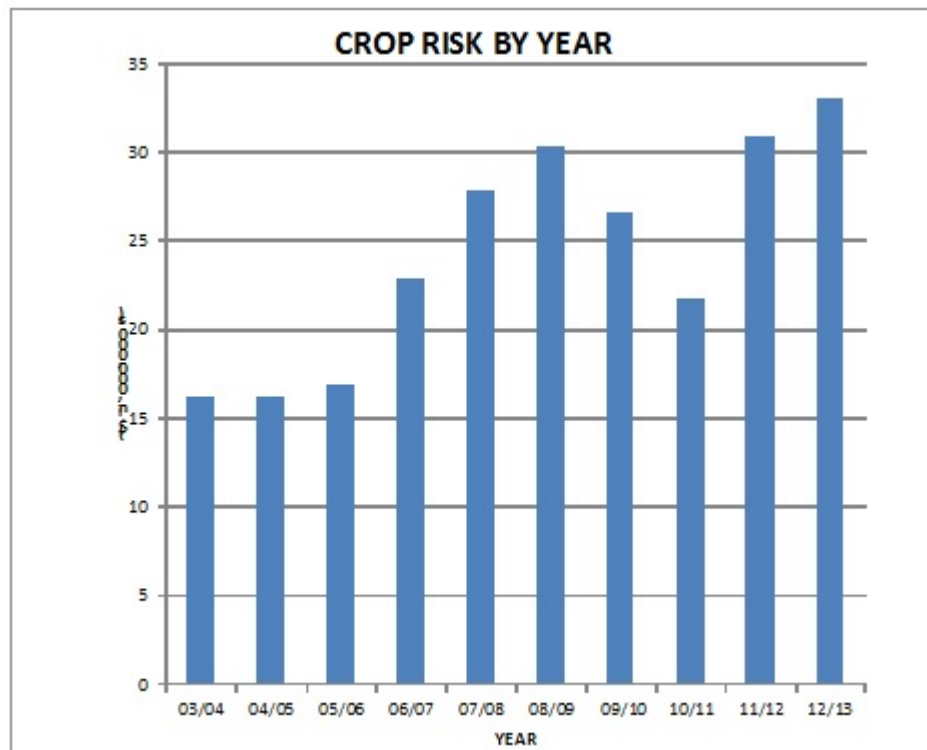

**STATISTICAL SUMMARIES
ANNUAL SUMMARY OF INSURANCE PLANS 2012-13**

PLAN	NO. GROWERS	NO. ACRES	TOTAL COVERAGE	TOTAL PREMIUM	TOTAL INDEMNITIES

2012-13 Summary

The Commission wrote \$177.6 million in coverage in 2012-13. This represented a 26% increase in coverage over the previous year. Insurance coverage was broken down as 19% for crops, 25% for dairy and 56% for poultry. The total premium collected was \$1.924 million, which represented a 21% increase over the previous year. This increase was mainly a result of increased premium collected for crops due to stronger commodity prices and an increase in blueberry, corn, potato, vegetable, and weather derivative acreage.

The 2012 cropping season saw very good growing conditions for most crops. For annual crops planting began 2-3 weeks ahead of normal. Many forage producers were able to complete their 1st cut of forage by late May or the first of June. July began very dry and remained so into mid-August stressing some crops, particularly in the Valley region.

The cropping conditions in 2012 resulted in the payment of 98 indemnity payments to insured clients totaling \$1.307 million. These indemnity payments were 45% less than the previous year and more typical of an average loss rate across all insured crops. The payments made in 2012 represented a significant amount of support to producers to help manage some of the natural risks they faced on their farms. For 2012-13 the largest payments were made to lowbush blueberry (\$476,312.), tree fruit (\$250,470.), vegetables (\$247,357.), potatoes (\$133,553.), weather derivative (\$48,552.) and strawberries (\$41,703.).

Dairy livestock indemnity payments in 2012 totaled \$24,600. There were no indemnity payments made in the Poultry ILT Plan. In its 5th year of operation the Canada Nova Scotia Wildlife Compensation Program made payments for 107 claims totaling \$81,765. This represented a decrease of 55% compared to the previous year.

The Commission continued with its developmental work to expand the insurance options available to Nova Scotia producers to assist them with risk management options on their farms. The Commission was successful in achieving most of the priorities set out in its 2012-13 Business Plan. These included:

- Inclusion of day neutral strawberries as an insurable crop in the Strawberry Plan.
- Initiating changes to the seeding dates and agronomic zones in the Winter Grain Plan.
- Permanently reducing the crop averaging period in the Tree Fruit Plan from 15 to 10 years.
- Consultations began with potato growers to make changes to this plan that would allow for early season potato coverage.
- Research was initiated into possible development of an Acreage Loss Insurance Plan including initial consultation with organic growers.

- Offered to work on potential plan development with both the grape and bee sectors.
- Participated in a Stakeholder Working Group regarding wildlife issues, including the Commissions Wildlife Compensation Program.

The Commission also worked to address several administrative priorities, including:

- Participation in national level AgriInsurance Policy and Program design discussions leading up to Nova Scotia's ratification of the FPT Growing Forward 2 Agreement.
- Refocused resources internally aimed at improving the Commissions Information Technology Infrastructure. Gains were made in addressing a number of reliability and security issues in 2012-13.
- Promoted AgriInsurance within the province at industry events and Trade Shows. Conducted a Client Survey which provided valuable feedback to inform program improvements both in policy and administrative practices.
- In consultation with the Federal government, the Commission worked on language for a 2011 Operational Document, however this was not completed as of March 31, 2013.

TABLE 1. ESTIMATE - ACTUAL 2012-13

	Estimate 12-13 (000)s	Actual 12-13 (000)s

Nova Scotia (Premium + Administration)	1,028	801
Total Program Expenditure	2,518	2,003

PERFORMANCE MEASURES

The core business of the Crop and Livestock Insurance Commission is the delivery of insurance products to the agriculture sector. As one of the pillars of Canada's financial system, insurance plays a key role in stabilizing business incomes by providing opportunities to manage or transfer risk. Crop production is particularly risk laden in that natural perils presented by climate and geography cannot easily be controlled or managed. The intended outcome of the Commission's program is to stabilize farm incomes, and by doing so, support the economic growth of the province.

	Measure	Base/Target (2004-05)	Target 2012-13	Future Direction Target 12-13*	Actual As of March 31/13
1.	Number of Farms Using Production Insurance	600	700	700	674
2.	Value of Insurance Coverage Written: The total dollar value of risk the Commission has accepted from its clients.	(Millions) 52.5	(Millions) 140	(Millions) 140	(Millions) 177.6
3.	Aggregate Coverage Level: The % of total insurable value covered by the program.	80%	87%	87%	85%
4.	Number of Insurance Products Available	14	16	16	16 (Includes Dairy & Poultry)
5.	Value of Compensation Paid for Wildlife Damage	N/A	\$250,000	\$260,000	\$81,675

* 2012-13 marks the end of Growing Forward, a Federal Provincial Territorial Framework Agreement on agriculture, agri-food and agri-based products policy and will be the basis for new Base Targets beginning in 2013-14 under Growing Forward 2.

Comments:

1. This measure fell just short of the target due primarily to fewer clients enrolling in spring grain, potatoes, weather derivative and dairy plans. As a voluntary, demand driven program, this measure does indicate increasing interest in AgriInsurance program features from the start of Growing Forward
2. This measure surpassed the target by 27% mainly due to increased coverage in blueberries and soybeans. A significant portion of the increase, \$9M was however due to reporting differences in the Tree endorsement Plan. Increases in coverage are the result of increased production and stronger prices for some commodities.

3. While lower than the Target Values this measure has been approaching the maximum coverage permitted (90%) for several years. Fluctuations are primarily attributed to clients choosing lower coverage levels to reduce the costs of their insurance.
4. While new crops have been added to existing plans, the actual number of plans offered has not changed dramatically over time. Several potential new plans are being researched with industry consultation.
5. This measure has been trending down over the last 2-3 years, with a significant drop in 2012-13. A combination of low reporting, and reduced damage may be contributing to this decline.

INDEPENDENT AUDITOR'S REPORT

To the Members of the Nova Scotia Crop & Livestock Insurance Commission:

Report on the Financial Statements

I have audited the accompanying financial statements of the Nova Scotia Crop & Livestock Insurance Commission, which comprise the statement of financial position as at March 31, 2013, and the statements of operations and changes in fund balances, changes in net financial assets, and cash flows for the year ended March 31, 2013, and a summary of significant accounting policies and other explanatory information.

Management's Responsibilities for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian generally accepted accounting principles for the public sector and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

My responsibility is to express an opinion on these financial statements based on my audit. I conducted my audit in accordance with Canadian generally accepted auditing standards. Those standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence I have obtained in our audit is sufficient and appropriate to provide a basis for my audit opinion.

Opinion

In my opinion, the financial statements present fairly, in all material respects, the financial position of the Nova Scotia Crop & Livestock Insurance Commission as at March 31, 2013, and the results of operations, changes in net financial assets, and its cash flows for the year ended March 31, 2013, in accordance with Canadian generally accepted accounting principles for the public sector.

**PROVINCE OF NOVA SCOTIA
NOVA SCOTIA CROP & LIVESTOCK INSURANCE COMMISSION
NOTES TO THE FINANCIAL STATEMENTS
MARCH 31, 2013**

1. Authority

The Nova Scotia Crop and Livestock Insurance Commission was established pursuant to Section 3(1) of the Nova Scotia Crop and Livestock Insurance Act (Act). Section 8(1) of the Act establishes Funds which are in the custody and control of the Commission to be used to administer plans of crop and livestock insurance, and conduct programs relating to these plans.

2. Significant accounting policies

These financial statements are prepared in accordance with Canadian generally accepted accounting principles for the public sector, that for the purposes of the Commission's financial statements are represented by accounting recommendations of the Public Sector Accounting Board (PSAB) of the Canadian Institute of Chartered Accountants (CICA), supplemented where appropriate by other CICA accounting standards or pronouncements.

These financial statements are prepared using the following significant accounting policies:

Tangible capital assets

Tangible capital assets are recorded at cost, net of accumulated amortization. Amortization is provided on a straight-line basis over the assets estimated useful life, which for office furniture and equipment is five years and for computer hardware and software is two years. At April 1, 2012, the estimated useful life of computer hardware and software reduced from either five or ten years to two years. As at April 1, 2012, the Commission also increased the threshold of tangible capital assets to \$1,500. The changes in estimated useful life and capitalization threshold have been applied prospectively. These changes resulted in the recognition of \$24,292 in amortization expense for the year ended March 31, 2013.

Revenues

Revenue is recorded on the accrual basis. The main components of revenue are insurance premiums, interest income, and government grants for insurance premiums and administrative expenses. Government grants for insurance premiums and administrative expenses are recognized as revenue in the period during which the grants are authorized and eligibility criteria are met, except when and to the extent the transfer includes stipulations that give rise to an obligation that meets the definition of a liability. The Commission receives contributions from the Province of Nova Scotia for the purchase of assets which is recognized in revenue upon acquisition.

Financial Instruments

The Commission's financial instruments consist of investments in promissory notes, accounts receivable, deferred revenue, and deposits for insurance. The Commission measures its financial instruments at cost or amortized cost.

Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the period. Actual results could differ from management's best estimates as additional information becomes available in the future.

PROVINCE OF NOVA SCOTIA
NOVA SCOTIA CROP & LIVESTOCK INSURANCE COMMISSION
NOTES TO THE FINANCIAL STATEMENTS
MARCH 31, 2013

3. Investments

The Commission invests excess funds to be used to pay future indemnity claims. At March 31, 2013 these funds were invested in various promissory notes maturing in fiscals 2014 and 2016, with yields from 1.17% to 2.802%.

4. Provision for payment of unsettled indemnities

Any indemnities for losses incurred in the fiscal year not paid as of year-end have been estimated and recorded as a liability in the financial statements, with the exception of indemnities for Winter Grain (see Note 16).

5. Tangible capital assets

	2013	2012
Cost of Equipment		
Opening cost	\$ 148,292	\$ 133,298
Additions	-	14,994
Disposals	<u>(109,744)</u>	<u>-</u>
Closing cost	<u>38,548</u>	<u>148,292</u>
Accumulated amortization		
Opening balance	120,429	110,473
Disposals	(106,526)	-
Amortization expense	<u>24,292</u>	<u>9,956</u>
Closing balance	<u>38,195</u>	<u>120,429</u>
Net book value	<u>\$ 353</u>	<u>\$ 27,863</u>

6. Fund balances

The Livestock Fund balance consists of dairy livestock insurance of \$915,838 (2012 - \$896,275) and poultry insurance of \$107,060 (2012 - \$81,554). A claim for indemnity under either the Dairy Livestock Insurance Plan or the Poultry Insurance Plan is limited to the extent of the assets in the Livestock Insurance Fund balance held by the Commission.

The General Fund includes wildlife compensation.

7. Government contributions

Insurance premiums

Under the crop insurance programs, producers pay 40% of the insurance premiums and the Federal and Provincial governments pay 36% and 24% respectively for the comprehensive portion of the insurance premiums. If an insurance premium contains a high-cost portion, the Federal and Provincial governments pay a reduced proportion of the high-cost portion of the insurance premium. The proportion of the insurance premium that is high-cost varies by plan and coverage level depending on the base rate for that particular plan. Neither the Federal nor Provincial governments cost share in the insurance premiums of the livestock and poultry insurance programs or in non-refundable deposits.

Administrative expenses

For the 2013 fiscal year, the Federal government contributed 60% (2012-60%) of the total administrative expenses for the crop insurance program, with the Provincial government funding the remainder. The Provincial government funds all of the administrative costs of the livestock and poultry insurance programs.

Wildlife program

The administrative expenses of the wildlife insurance plan are funded 60% by the Federal government and 40% by the Provincial government.

8. Administrative expenses

The Commission offers three types of insurance plans: crop, dairy livestock and poultry, and a wildlife compensation program. The administrative expenses associated with offering these programs are detailed in Schedule B. The administrative expenses are allocated to the livestock and poultry plan at 2% of the total administrative expenses incurred by the Commission. The administrative expenses of the wildlife plan are allocated based upon direct travel and staffing costs associated with investigating and adjusting wildlife claims, as well as an additional 25% of these costs for other fixed administrative costs of this plan. The remaining administrative costs, after deducting those attributable to the livestock, poultry and wildlife plans, are allocated to the crop insurance plan.

**PROVINCE OF NOVA SCOTIA
NOVA SCOTIA CROP & LIVESTOCK INSURANCE COMMISSION
NOTES TO THE FINANCIAL STATEMENTS
MARCH 31, 2013**

9. Net change in non-cash working capital balances related to operations

	2013	2012
Increase (decrease) in cash from changes in:		
Receivables	\$ (28,621)	\$ 3,929
Accrued interest receivable	(1,625)	(1,131)
Deposits for insurance	(5,054)	973
Unsettled indemnities	(15,837)	15,837
Deferred revenue	<u>8,801</u>	<u>(3,734)</u>
	<u>\$ (42,336)</u>	<u>\$ 15,874</u>

10. Financial instruments

The Commission is exposed to credit risk on the accounts receivable from its clients. In order to reduce its credit risk, the Commission has adopted credit policies which include the analysis of the financial position of its clients and the regular review of their credit limits. The Commission does not have a significant exposure to any individual client. It is management's opinion that the Commission is not exposed to any significant market or liquidity risks.

11. Related party transactions

Administrative expenses include \$30,000 (2012 - \$30,000) for rent and \$44,240 (2012 - \$44,240) for miscellaneous professional services that were charged to the Commission by the Nova Scotia Department of Agriculture.

12. Economic dependence

The Commission is economically dependent upon the ongoing and future funding of the Nova Scotia and Federal governments.

13. Insurance coverage

The total insurance coverage issued during the 2012 - 2013 fiscal year was \$177,713,429 (2012 - \$141,185,132), comprised of crop insurance of \$33,005,716 (2012 - \$30,877,363), livestock insurance of \$45,373,869 (2012 - \$33,553,771) and poultry insurance of \$99,333,844 (2012 - \$76,753,998).

14. Statement of rereasurement gains and losses

The Commission has no rereasurement gains or losses therefore, no statement of rereasurement gains or losses has been provided.

15. Pension and post-retirement benefits

All full time employees of the Commission are entitled to receive pension benefits pursuant to the provisions of a pension plan established under the Public Service Superannuation Act. The plan is funded by equal employee and employer contributions. The employer's contributions are included in the Commission's operating expenses. The Public Service Superannuation Fund is administered by the Department of Finance. The Commission is not responsible for any unfunded liability or other obligations related to post-retirement benefits. The pension expense incurred in the current year was \$40,584 (2012 - \$47,266).

16. Contingent liabilities

Winter grain

Winter Grain is planted in the fall, but not harvested until the following fall. Therefore yields for Winter Grain are not known until well after the annual financial statements have been prepared. Crops yields can fluctuate dramatically depending upon factors such as weather conditions during the growing and harvesting seasons. As a result, the occurrence and amount of losses relating to this year's crop, if any, cannot be reasonably estimated at this time and therefore no provision has been recorded in the financial statements. In most cases, the indemnity expense for Winter Grain will be recorded in the year it is paid.

Re-insurance premiums

The Province was party to an agreement with the Government of Canada whereby the Province made advances to a fund administered by the Government of Canada called the Crop Re-Insurance Fund of Canada for Nova Scotia. The purpose of this Fund was to assist the Province of Nova Scotia when there was a requirement by the Province to make advances to the Commission for the payment of crop insurance indemnities. Advances to this Fund had been recorded by the Province as a loan receivable totaling \$709,345 from the Commission. As of March 31, 2013, this amount has been resolved and no longer is an issue between the Commission and the Province. This amount has been assumed by the Province.

17. Public Sector Compensation Disclosure Act

Under the Public Sector Compensation Disclosure Act, all organizations which are part of the Government Reporting Entity must disclose all compensation paid to any person that is greater than \$100,000. There are no amounts to disclose under this Act.
