If recent surgery, Date of Surgery: YYYY / MM / DD Type of Surgery:
Type of Dressing & How often to be changed? If Code Status has been established, Please clarify:

Other Comments:

Are you the patient's family physician? Yes No If No, Name of family physician:
Will family physician follow patient once admitted to LTC facility? Yes No Not Known
Yes, for specific area ONLY:

Signature of Physician Print Name: Phone:
Signature: Date:
Specific Care Coordinator Name: Fax:

Medical Status Report for Admission to a Long Term Care Facility

- To be completed by the patient's attending physician.
- Purpose of the Form:
 - The Medical Status Report complements the functional assessment form completed by a Care Coordinator, as part of an individual's admission to a long term care (LTC) facility. It is intended to provide medical information concerning a patient when admission to a LTC facility is being considered. In particular, this form allows the physician to communicate to the LTC facility that their patient is medically suitable for admission.
- Expires:
 1. The form **must not be** older than 90 days at LTC facility admission.
 - This form **is** required by LTC facilities prior to admission.
 2. Notwithstanding item 1, whenever there is a "significant change" in the applicant's condition prior to LTC facility admission, the Medical Status Report must be updated by the attending physician.
 - A "significant change" in the applicant's condition is one which will impact the care plan for the applicant.
- Updating Forms:
 - If an applicant's *Medical Status Report* requires update as per items 1 or 2, it is to be forwarded to the Continuing Care Intake Office that coincides with your area. The Continuing Care Staff shall ensure that the updated form is reviewed by the appropriate personnel.

Send Completed/Updated Medical Status Reports to the Continuing Care Office in your area or if specified below, directly to the Care Coordinator:
