

# Immunization **protects**

Immunization protects **everyone** against many diseases, such as:

- Diphtheria
- Whooping Cough
- Tetanus
- Polio
- Haemophilus Influenzae type b
- Pneumococcal pneumonia
- Meningococcal disease
- Chickenpox
- Measles
- Mumps
- Rubella
- Influenza
- Hepatitis B
- Human papillomavirus (HPV)

**Are you up to date?** Ask your health care provider or local Public Health Services office about immunization for you and your family.
