

Summary of Nova Scotia surveillance findings, for the 2 week period ending July 14, 2012:

- There was no influenza activity reported for weeks 27 & 28.
- Positive results were received for adenovirus, mycoplasma pneumoniae and RSV.
- The ILI rate for Nova Scotia for this reporting period was 0.6 and DHA 4 did not report.

Note: While influenza surveillance continues to be monitored weekly, reporting will occur on a biweekly basis during the summer season.
