**Assessment**

- **airway/ventilation adequate**
  - **No**
    - see advanced airway management protocols
  - **Yes**

  - **BP/perfusion adequate**
    - **No**
      - see shock protocols
    - **Yes**
      - IV N/S 2cc/kg/hr or to maintain SBP > 90mmHg

- **cool patient**
  - PCP ICP ACP CCP

- **Transport**
  - PCP ICP ACP CCP

---

*to cool
- expose as much of patient's body surface area to air as feasible
- place cold packs/ice on head, neck, axilla and/or groin
- wet patient's skin with water
