**see advanced airway management protocols**

Assessment
- vital signs*

No

- airway/ventilation adequate
  - PCP ICP ACP CCP
  - see advanced airway management protocols**

Yes

BP/perfusion adequate

No

- see shock protocols

Yes

- place in ambulance
- prevent further heat loss

- be alert for preceeding injuries

- shivering

No

- apply hot packs to neck, axilla and groin (trunkal rewarming)
- high flow O2

Yes

- IV N/S 2cc/kg/hr (warm if possible)

- IV N/S 2cc/kg/hr (warm if possible) or titrate to maintain SBP > 90mmHg

PCP ICP ACP CCP

Transport

*check for vital signs for 30-40seconds

**intubation should be preformed as gently as possible
