

Fisheries and Aquaculture

Reportable Mortality Event

March 15, 2019

The Nova Scotia Department of Fisheries and Aquaculture is confirming a reportable mortality event in March at a salmon aquaculture site located on the south shore of Nova Scotia.

Samples of fish were being collected by the Department. The cause of the mortality appears to be weather related.

In keeping with a commitment to transparency, public notices are posted to the Aquaculture website at <https://novascotia.ca/fish/aquaculture/>
