

Findings and Decision- Renewal Application of Paul Budreski for AQ#0177

1. Overview:

On January 5, 2016 the Nova Scotia Department of Fisheries and Aquaculture (NSDFA) received all required information from Paul Budreski to renew Aquaculture Licence and Lease #0177 (AQ#0177), as described below:

Table 1. Description of Aquaculture Licence and Lease #0177

Type: Marine Shellfish	Size: 22.24 HA
Number: AQ#0177	Cultivation Method: Bottom shellfish without gear method
Applicant: Paul Budreski	Species: American oyster, Bay scallop, Bar clam, Bay quahog
Location: Little Harbour, Pictou County	Proposed Term: 10 year Licence/20 year Lease

2. History

AQ#0177 was first issued to Little Harbour Fisheries on February 27, 1991 for a ten year term (February 27, 1991 to February 27, 2001). AQ#0177 was assigned from Little Harbour Fisheries to Paul Budreski on July 15, 1993. AQ#0177 was renewed on January 9, 2001 for a five year term (February 27, 2001 to February 27, 2006). AQ#0177 was renewed on June 16, 2006 for a five year term (February 27, 2006 to February 27, 2011). AQ#0177 was renewed on March 9, 2011 for a five year term from February 27, 2011 to February 26, 2016.

3. Procedure

3.1 Performance Review

A performance review of the information submitted by the operator in support of their renewal application was completed. This review recommended that the site be renewed based on the technical and biological assessment. This performance review is required pursuant to Subsection 72(c) of the Aquaculture Licence and Lease Regulations, and was completed on February 26, 2016.

3.2 Public Comment Period

Notice of the application for the renewal of AQ#0177 for the 30-day public comment period was published on NSDFA's website (<http://novascotia.ca/fish/aquaculture/public-information/>) for the period of March 3, 2016 to April 1, 2016. Notice of the application was also published in the Royal Gazette Part I on March 2, 2016, March 9, 2016, March 16, 2016, and March 23, 2016.

3.3 Submissions

Zero submissions were received by NSDFA during the 30-day public comment period.

4. Factors to be considered

In recent years, AQ#0177 has had consistent employment and production. The renewal plan indicates continued production is planned for this site and therefore resulting employment. Should the operator not operate the site as indicated, the Department's site utilization review procedures will be triggered. AQ#0177 is one of five sites held by the operator, and forms part of a multi-site and multi-species operation.

The performance review and subsequent public comment period did not note the presence of other fishery activities in the area of the site. There were no ecological concerns identified in the past performance of this site with respect to negative impacts on other fisheries. The operator indicates appropriate measures for dealing with predation concerns. AQ#0177 is authorized for the bottom cultivation of shellfish without gear, and as such there is no gear permitted within the boundaries of the lease which mitigates concerns pertaining to navigation. Section 55 of the *Licence and Lease Regulations* requires an aquaculture licence holder to mark each of their sites in a manner determined by the Minister (see below) and keep each site marked during the term of their licence.

AQ#0177 is located in the near-shore environment, varying in distance from the shoreline. The western boundary of AQ#0177, at its nearest point, is within approximately 150 metres of the Little Harbour Road leading out to Melmerby Beach Provincial Park; however, the licence and lease documents for AQ#0177 will allow for access to the site by the general public for recreational activities, provided that the public does not harvest the product on site. This clause serves to reduce potential interference with other users. AQ#0177 is within 200 metres of Melmerby Beach Provincial Park; however, there were no concerns raised during the performance review or public comment period with respect to other users of the marine environment.

AQ#0177 is licensed to cultivate shellfish species, and as such there is no evidence that shellfish aquaculture has impacts on the sustainability of wild salmon. Two other aquaculture sites are within 0.5 km of AQ#0177, both of which are also operated by Paul Budreski. There is no evidence to suggest that the extent of existing aquaculture in the harbour has exceeded the carrying capacity of the harbour.

5. Decision

Based on the considerations above, Aquaculture Licence #0177 shall be renewed for a period of 10 years (February 27, 2016 to February 27, 2026) and Aquaculture Lease #0177 shall be renewed for a period of 20 years (February 27, 2016 to February 27, 2036).

The Licence and Lease documents shall be prepared in accordance with the standard operating documents of NSDFA, and shall be made publically available subject to the provisions of the *Freedom of Information and Protection of Privacy Act*.

6. Conditions

In addition, the following condition shall apply:

The operator shall adhere to the following site marking requirements:

- a) mark all corners of the leased site with cautionary yellow buoys of a minimum of 60 cm in diameter;
- b) mark all corners of the leased bottom with a cement block or similar device of a weight sufficient to ensure the cement block or device remains in place at all times; and
- c) display the licence or lease number at 1 corner of the licensed or leased area.
