

# Call for Projects

## Green Infrastructure Projects that Reduce Greenhouse Gas Emissions

for Climate Change Mitigation in Nova Scotia

### Webinar Registration

The Nova Scotia Department of Energy and Mines recently announced a call for applications for potential new infrastructure projects that reduce GHG emissions to be submitted to the Climate Change Mitigation Sub Stream of the Investing in Canada Infrastructure Program. Through this stream of funding, Nova Scotia will invest in projects that increase capacity to manage more renewable energy, access to clean energy transportation, energy efficiency of buildings and generation of clean energy.

We will be hosting webinars to share information about the Call for Projects and answer questions you might have about eligibility, your potential project, the application process or other questions. If you are interested in attending a webinar, please fill out your preferred date in this [form](#).

For more details on the Call for Projects, project category details, eligibility and for up to date information and resources:

<https://novascotia.ca/infrastructure-projects-reduce-greenhouse-gas-emissions/>

If you have any questions, please contact [lowcarboninfrastructure@novascotia.ca](mailto:lowcarboninfrastructure@novascotia.ca)

We look forward to hearing about your project.

Please feel free to share this information with anyone you feel may benefit from this opportunity.

Sincerely,

The Green Infrastructure team
