Interim Accountability Report

What is an Interim Accountability Report?

The Interim Accountability Report has been designed to streamline reporting and improve accountability and must be submitted during each project. The objective of the Interim Accountability Report is to provide an understanding of your project's performance throughout the project duration by analyzing what has been accomplished. The report also assists in identifying possible issues which could affect the success of your project. You can use the Interim Accountability Report to demonstrate how funding is used to support your project objectives and provide information on progress and change.

Note that completion of the Interim Accountability Report is a condition of the funding agreement, and this report must be attached (as Supplementary Documentation) to the Activity and Financial Reports submitted in the Labour Market Program Support System (LaMPSS).
