

Fuel Safety Bulletin

2013-02

Dated: June 19, 2013

Subject: Uncertified and Converted Equipment Requiring Special Inspection and Approval

In Nova Scotia, under the Fuel Safety Regulation, the inspection and approval of uncertified, one-off, and converted/modified gas appliances and equipment is to be conducted by nationally recognized Certification Bodies and Inspection Bodies accredited by the Standards Council of Canada.

A special inspection is not intended to be used as a means to accept appliances and equipment when certified products of similar type are available.

When certified products are not available, a special inspection and approval must be conducted by one of the following Certification/Inspection Bodies currently operating in Nova Scotia.

UL

Chuck Mello

Program Manager: UL Field Evaluation Services

Ph: 877-854-3577 prompt #2
