Technical Safety Division

DIRECTIVE

(Issued pursuant to s.30 of the Technical Safety Act)

DIRECTIVE #: FSD 2015-002

SECTION: Fuel Safety

SUBJECT: Fuel Safety Regulations, Section 87

ISSUED BY: Paul Fowler, Chief Inspector (Acting), Fuel Safety

ISSUE DATE: June 19,2015

REV. #:

REV. DATE:

EFFECTIVE DATE: June 19,2015

For the purposes of implementation of the Fuel Safety Regulations, the enforcement of s.87 of the regulations is delayed until June 30,2016.

The delay is in response to concerns that have been brought forward that the details of the inspection program have not been developed to the extent that there would be compliance with the requirement.

During this period of delay, the Technical Safety Division will continue to provide education and notification of the change. The Division will provide support to the heating oil suppliers to develop a program including the procedures and training necessary to comply with this provision.

This directive replaces Directive TSA-007, Version 1.0, June 26,2014

Questions or comments regarding this directive may be addressed to the Chief Inspector, Fuel Safety.
