

Release 5.6.3

Release Notes for External Users

LaMPSS Release 5.6.3 is a maintenance release that addresses several high-priority issues across LaMPSS. This release focuses on resolving recurring issues with significant support impact and includes enhancements to Person Search, IPG, and various other improvements and fixes throughout LaMPSS.

Search

Introduced some Search enhancements

- **Person Search - New Search Mode** – Added a new search option that allows users to choose between Exact Match and Similar (Fuzzy) Match searches. Previously, Person Search supported only Similar (Fuzzy) Match searches.

IPG

- **NSNP Application Form – Dependents Section Update** – Updated the wording in the Dependents section of the application Form to prevent applicants from entering spouse information multiple times. Previously, references to spouse information appeared in two separate sections of the form, which could occasionally result in duplicate information being collected.
- **IPG Portal – Upload Documents Link Visibility** – Updated the security configuration to ensure that organization contacts who are granted Owner/Submit access after an AIP application has been submitted can view the 'Upload Documents' link in the Forms History section. This change ensures that newly assigned owners can upload required documents when the application is in the Awaiting Document Upload stage.
- **Update the 'View/Access In-Progress Forms' screen** - Removed the hyperlink from the Case ID field on the 'View/Access In-Progress Forms' screen for external users with NSNP Rep security when the form has already been submitted and associated with a case. This change prevents the screen from crashing when external users select the Case ID link.
- **Associated Cases Access Improvement** - Updated the Organization Home Page so applicant name hyperlinks in the Associated Cases section are only displayed to users with access to the Client Home Page. This prevents navigation errors and screen crashes for unauthorized users while maintaining access for authorized users.

Miscellaneous

- **PCC Notification** - Updated Training Completion Fund (TCF) payment and Program Registration notifications to display the Program ID instead of the internal Training Program Detail ID. This change ensures that notifications show the user-facing Program ID recognized by users, improving clarity and aligning the notifications with the intended design and specifications.
