

Release 2.10.2

Release Notes for External Users

Release 2.10.2 is a small release addressing some time-sensitive defect fixes and enhancements. Most of the changes pertained only to internal government users, but there were two changes that affect External users.

Person Management

- **Person Home Page: Associated Services**
 - TFS 22887: Added the ability to click on the service id to view the service details page

External Case Management

- **Person List Report**
 - TFS 24108: Improved the performance of the Person List Report – it should run significantly faster than before! 😊
