

Need new skills to grow your business? Now is a great time to start planning for new training opportunities.

Workplace Innovation and Productivity Skills Incentive (WIPSI)

The Workplace Innovation and Productivity Skills Incentive (WIPSI) is a grant that supports the development of new skills to help businesses increase their productivity, innovation, competitiveness, and address diversity, equity and inclusion (DEI), to make them more competitive outside of Nova Scotia.

WIPSI typically supports training on new software or equipment, continuous process improvement, and training that can make workplaces more inclusive. Some examples of WIPSI training support include re-tooling and skill development, technology and optimization, robotics and automation, and DEI training to help to improve an organization's current services, workplace culture and hiring processes.

For eligible businesses and training, WIPSI can support up to 100% of the direct training costs up to \$10,000, and 50% of the remaining training costs.
