

Nova Scotia Department of Lands and Forestry

OLD FOREST

Project Objective

To review the Old Forest Policy, and further develop identification criteria that will facilitate more effective land use planning by accelerating assessments of potential old forest and the conservation of old growth

Project Team Lead

Mark Pulsifer, MSc (Biology), Project Manager, Lands and Forestry (L&F)

Experts Involved

- Dr. Peter Duinker, PhD, MES, BScAgr, Professor, School for Resource and Environmental Studies, Dalhousie University

Key Deliverables

- Updated Old Forest Policy for Nova Scotia
- Methodologies for identification of old forests and acceleration of their assessment
- Research to better understand and identify old growth conditions in non-traditional species such as red maple, red oak, and black spruce
- Updated old forest layer (GIS) on the Provincial Landscape Viewer
- A restoration pathway for inclusion in the Forest Management Guide

Expected Areas of Stakeholder and/or Public Participation (may not be limited to)

- Updates to the Old Forest Policy
- Identification of Pre-Treatment Assessment triggers, to revise existing criteria
- Restoration pathway for the Forest Management Guide
- Approaches to managing hardwood old forest
