## NOVA SCOTIA REGISTRY OF BUYERS SUMMARY - 2006

The total provincial harvest for 2006 is reported to be 5 209 192 cubic meters of solid wood. Of this amount, 88% or 4 566 816 cubic meters were softwood species. The total volume of wood acquired for export was reported to be 907 897 cubic meters, or 17% of the total harvest.

The provincial harvest for 2006 shows a decrease of 16.7% when compared to the 2005 harvest of 6 254 716 cubic meters.

Statistical returns were received from 314 Registered Buyers. Data was estimated for 2 non-compliant buyers, for a total of 316 Registered Buyers. Of the 316 buyers, 213 were reported to be active in the 2006 calendar year.

A ten month shut down at Nova Scotia's largest pulpmill, Stora Enso, precipitated a significant decrease in the amount of pulpwood harvested in 2006 and an increase in the amount of pulpwood exported because of poor markets.

**Note:**

The volume of firewood harvest included in this report reflects only the amount acquired by registered commercial firewood businesses. Firewood businesses acquiring less than 1000 m3 are not required to register.

In 2004 Natural Resources Canada conducted a survey and reported the quantity of wood used as a household energy source. The Natural Resources Canada report, entitled "Survey Of Household Energy Use – 2003", indicates that as much as 450 000 cubic meters of wood may be used as a household energy source on an annual basis in Nova Scotia.

## WOOD ACQUISITION PLAN PROGRAM - 2006

### Summary

The Wood Acquisition Plan (W.A.P.) Program required by the Forest Sustainability Regulations completed the seventh year of operation in 2006. All Registered Buyers that acquired greater than 5,000 m<sup>3</sup> from privately owned forest lands in Nova Scotia during the 2006 calendar year were required to submit a Wood Acquisition Plan for that volume by Feb 28, 2007. Most compliant Registered Buyers opted for undertaking a silviculture program for the year 2006, and submitted a summary of completed silviculture (Form D, Part III) for claim in 2006 along with supporting silviculture site location details.

The volumes from 2006 that required a Wood Acquisition Plan totaled 4.509 million cubic metres (Table 1). From those volumes, a total of 11.634 million silviculture credits were required in year 2006, and the summary reports indicated that 16.329 million silviculture credits were claimed, which included 14.697 million actual silviculture credits and 1.63 million administrative credits (Table 1).

Registered Buyers also contributed 2,344 dollars to the Sustainable Forestry Fund . In addition, the Department of Natural Resources also contributed 650,000 dollars to the fund on behalf of Registered Buyers.

Industrial silviculture credits exceeded credits required in 2006 (Table 1) by 2.43 million. Private silviculture credits exceeded credits required by 2.26 million.

A total of 34,612 hectares of silviculture for a credit value of 14.697 million were claimed in 2006 (Table 2). Early Competition Control (Category 3) recorded the most area claimed at 27.76% which accounted for 19.61% of the total credit value (Table 2). Established Plantation (Category 2) recorded 25.45 % in area but accounted for 38.97 % of total credit value claimed in 2006 (Table 2).

Categories 4 and 5 combined had approximately 22% of claimed area. Category 1 had 21% of the claimed area while Categories 6 and 7 accounted for 3% of area claimed in 2006 (Table 2).

Softwood silviculture completed on all lands was 98.5% of the total credit value claimed in year 2006 (Table 3). Hardwood silviculture dropped to 1.5% of total credit value because completed silviculture did not meet required credit value.(Table 1).

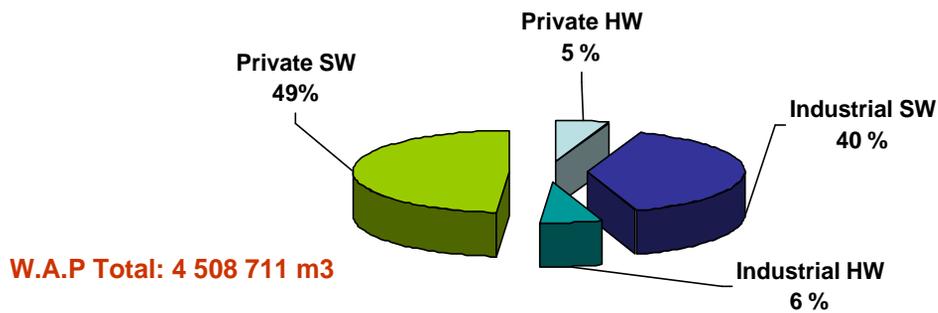

A breakdown of completed silviculture by category and ownership is described in Table 4. Private silviculture value claimed in the Wood Acquisition Plans for 2006 totaled 7.537 million credits (Table 4). Industrial silviculture claimed through Wood Acquisition Plans for year 2006 totaled 7.159 million credits (Table 4).

A summary of completed silviculture area claimed in year 2006 by silviculture category, ownership and species type is included in Table 5.
