Sampling & Mill Testing.

Extend Drifts and Cross-cuts as shown. Sample vein and wall rock separately each round advanced. Sample all existing backs. Slash backs and Mill test with ore from advancing faces each vein in turn.

See 1941 Mines Report
 p.39

LEGEND.

- New drifting & Cross cutting (about 600')
- Proposed extensions (about 600')
- all old drifts & Cross cuts had to be slashed and regraded.
