

LEGEND

- 6 Windsor Group
Maroon siltstone, gypsum, limestone, limy siltstone and sandstone
- 4 Horton Group
Red and grey conglomerate, sandstone, siltstone and arkosic sandstone
- 3 Devonian or earlier
Granite and syenite with numerous inclusions of 1, composite gneiss, hybrid granite, 3a, granite and diorite, some earlier than 2.
- 2 Mainly granite, syenite and granodiorite
- 1 George River Group
Quartzite, limestone, paragneiss; chlorite schist, quartz-sericite schist; minor slate and volcanic rocks

- Drift covered area
- Rock outcrop X
- Geological boundary (defined, approximate, assumed)
- Bedding (inclined, vertical, overturned, top unknown, dip unknown)
- Schistosity (inclined, vertical, dip unknown)
- Fault (defined, approximate, assumed)
- Fossil locality (F)
- Quarry, (limestone) Ls
- Mineral occurrence X Cu
