

MINERAL RESOURCE LAND-USE MAP OF THE OWLS HEAD AREA (11D/10) (1:50 000)

OFM ME 2000-4 (11D/10) Version 2

11D/10 Owls Head

Compiled by D.B. Hopper, F.J. Bonner, B.E. Fisher and A.N. Murphy Halifax, Nova Scotia

A grid of 98 thematic (1:50 000 scale) Mineral Resource Land Use (MRLU) maps combine to form a thematic atlas, which covers the province of Nova Scotia including all near-shore islands and Sable Island.

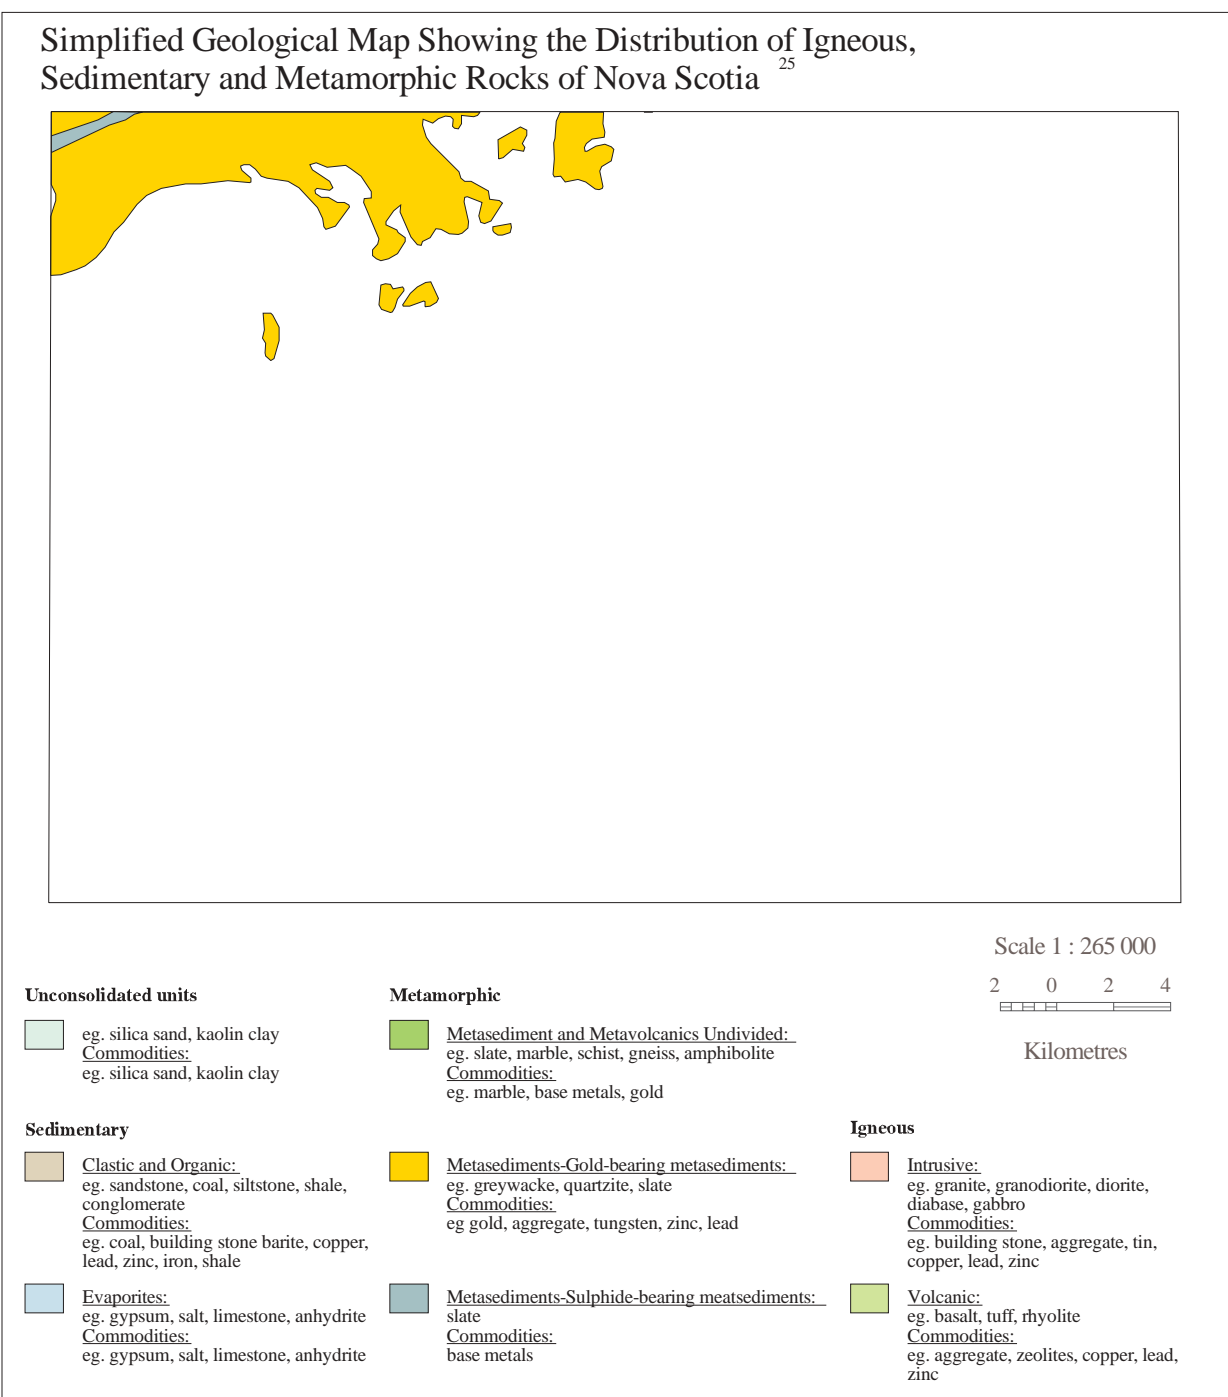

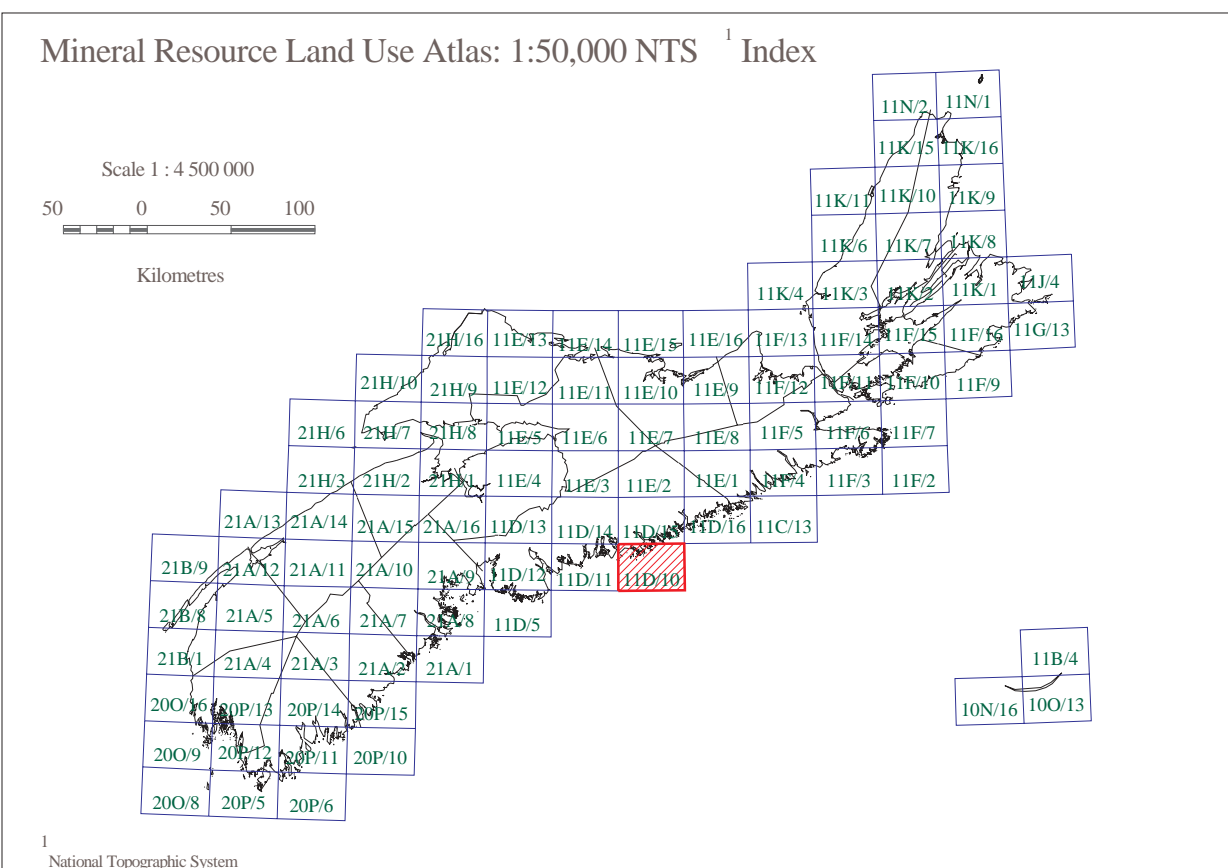

The MRLU maps depict the location and distribution of mineral and energy resources and related activities as well as aspects of environmental geology that relate to land use and environmental planning.

Over the course of developing this project, several companies have contributed to the preparation of these maps, which involved gathering and organizing data from databases managed by the department as well as other government departments, agencies and non-government organizations.

Base data derived from the Nova Scotia Topographic Database (NSTDB). Copyright Her Majesty the Queen in Right of the Province of Nova Scotia. The NSTDB is available from the Service Nova Scotia & Municipal Relations, Nova Scotia Geomatics Centre (NSGC), Antigonish, Nova Scotia.

This map was generated from information stored in the Mineral Resources Branch (MRB) Geographic Information System of the Nova Scotia Department of Natural Resources (NSDNR).

The thematic information shown on this map came from many different government and non-government sources. The NSDNR accepts no liability for errors, deficiencies or faults on the map.

References and Notes
Mineral occurrence database, NSDNR, 1999. Digital Geoscience Data Product DP001b, Version 3, 1998. This database can be used with FPO16, the Mineral Occurrence Query Program, which is a viewing and searching program with instructional manual for use with Mineral Occurrence Database.

MINERAL AND AGGREGATE RESOURCES, ENERGY RESOURCES, GEOLOGY FOR LAND-USE / ENVIRONMENTAL PLANNING, LAND DESIGNATION AND ACCESS. Legend for symbols and colors used in the map, including Mineral Occurrence, Active Coal Mine, Areal Extent of Underground Coal Mine Workings, etc.
