

MINERAL RESOURCE LAND-USE MAP OF THE LA HAVE ISLANDS AREA (21A/1) (1:50 000)

OFM ME 2000-4 (21A/1) Version 2

21A/1 La Have Islands

Compiled by D.B. Hopper, F.J. Bonner, B.E. Fisher and A.N. Murphy Halifax, Nova Scotia

A total of 59 thematic (1:50 000 scale) Mineral Resource Land Use (MRLU) maps combine to form a thematic atlas, which covers the province of Nova Scotia including all near-shore islands and Sable Island.

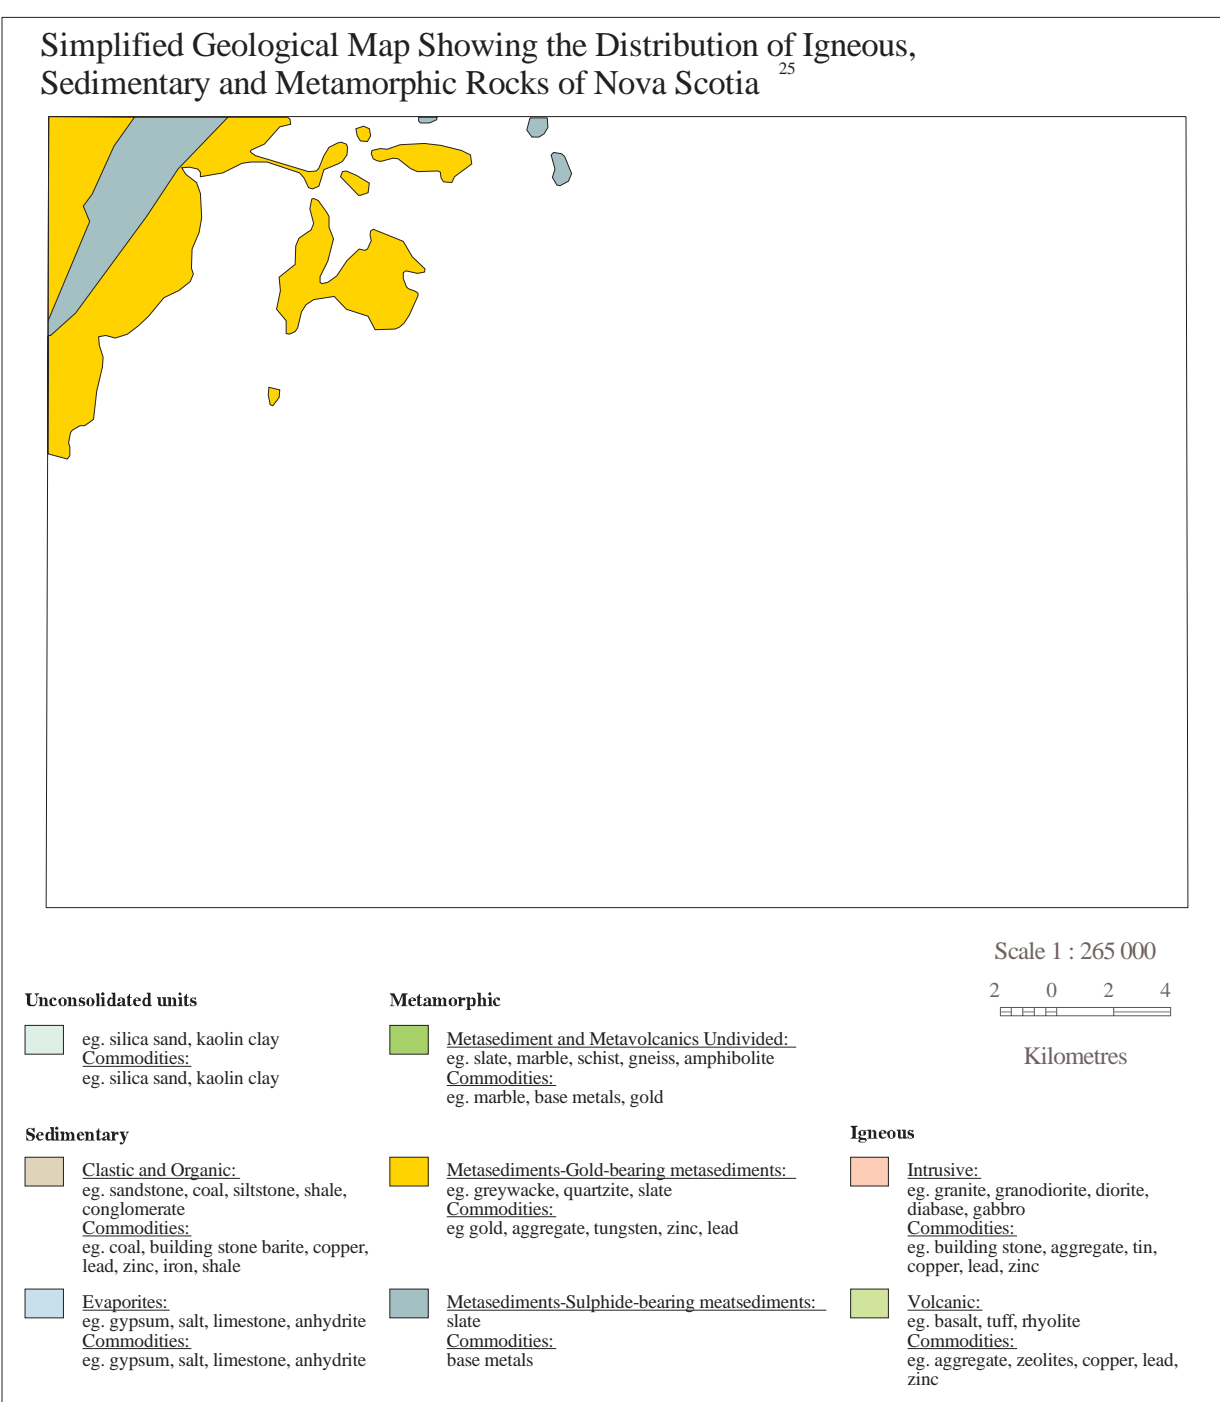

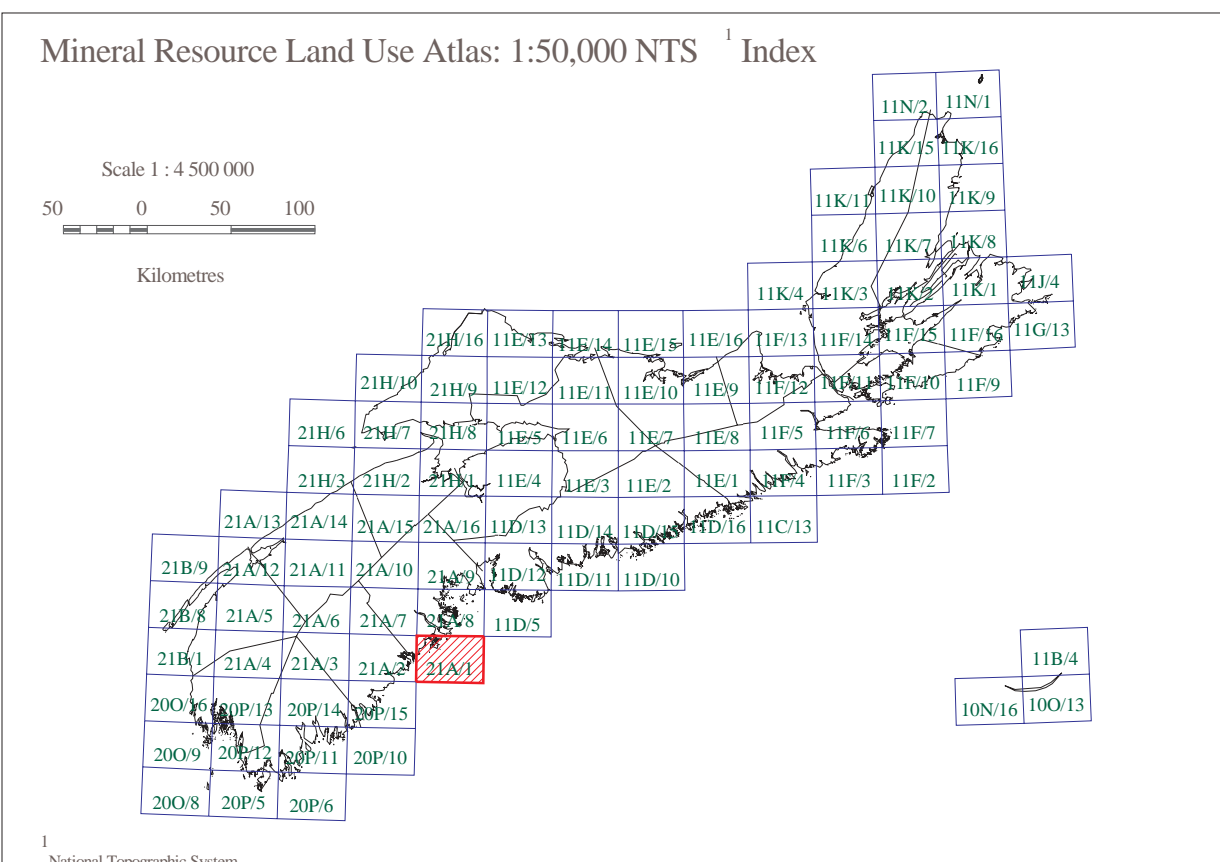

The MRLU maps display the location and distribution of mineral and energy resources and related activities as well as aspects of environmental geology that relate to land use and environmental planning.

Over the course of developing this project, several companies have contributed to the preparation of these maps, which involved gathering and organizing data from databases managed by the department as well as other government departments, agencies and non-government organizations.

Base data derived from the Nova Scotia Topographic Database (NSTDB). Copyright Her Majesty the Queen in Right of the Province of Nova Scotia. The NSTDB is available from the Service Nova Scotia & Municipal Relations, Nova Scotia Geomatics Centre (NSGC), Antigonish, Nova Scotia.

This map was generated from information stored in the Mineral Resources Branch (MRB) Geographic Information System of the Nova Scotia Department of Natural Resources (NSDNR).

The thematic information shown on this map came from many different government and non-government sources. The NSDNR accepts no liability for errors, deficiencies or faults on the map. Since land-use information is dynamic and subject to change over time, updated versions of this map will be provided in the future.

References and Notes
1. Mineral occurrence database, NSDNR, 1999. Digital Geoscience Data Product DP0010, Version 3, 1998. This database can be used with FPO16, the Mineral Occurrence Query Program, which is a viewing and searching program with instructional manual for use with Mineral Occurrence Database.

Table with 2 columns: MINERAL AND AGGREGATE RESOURCES and ENERGY RESOURCES. Includes symbols and descriptions for items like Mineral Occurrence, Active Mine, Coal Seam Trace, Fuel Peat Occurrence, Geothermal Resource Area, Surface Petroleum Show, Well/Drill hole with Petroleum Significance, Underground Gas Storage, Horticultural Peat Occurrence, Active Coal Mine, and Coal Seam Trace.

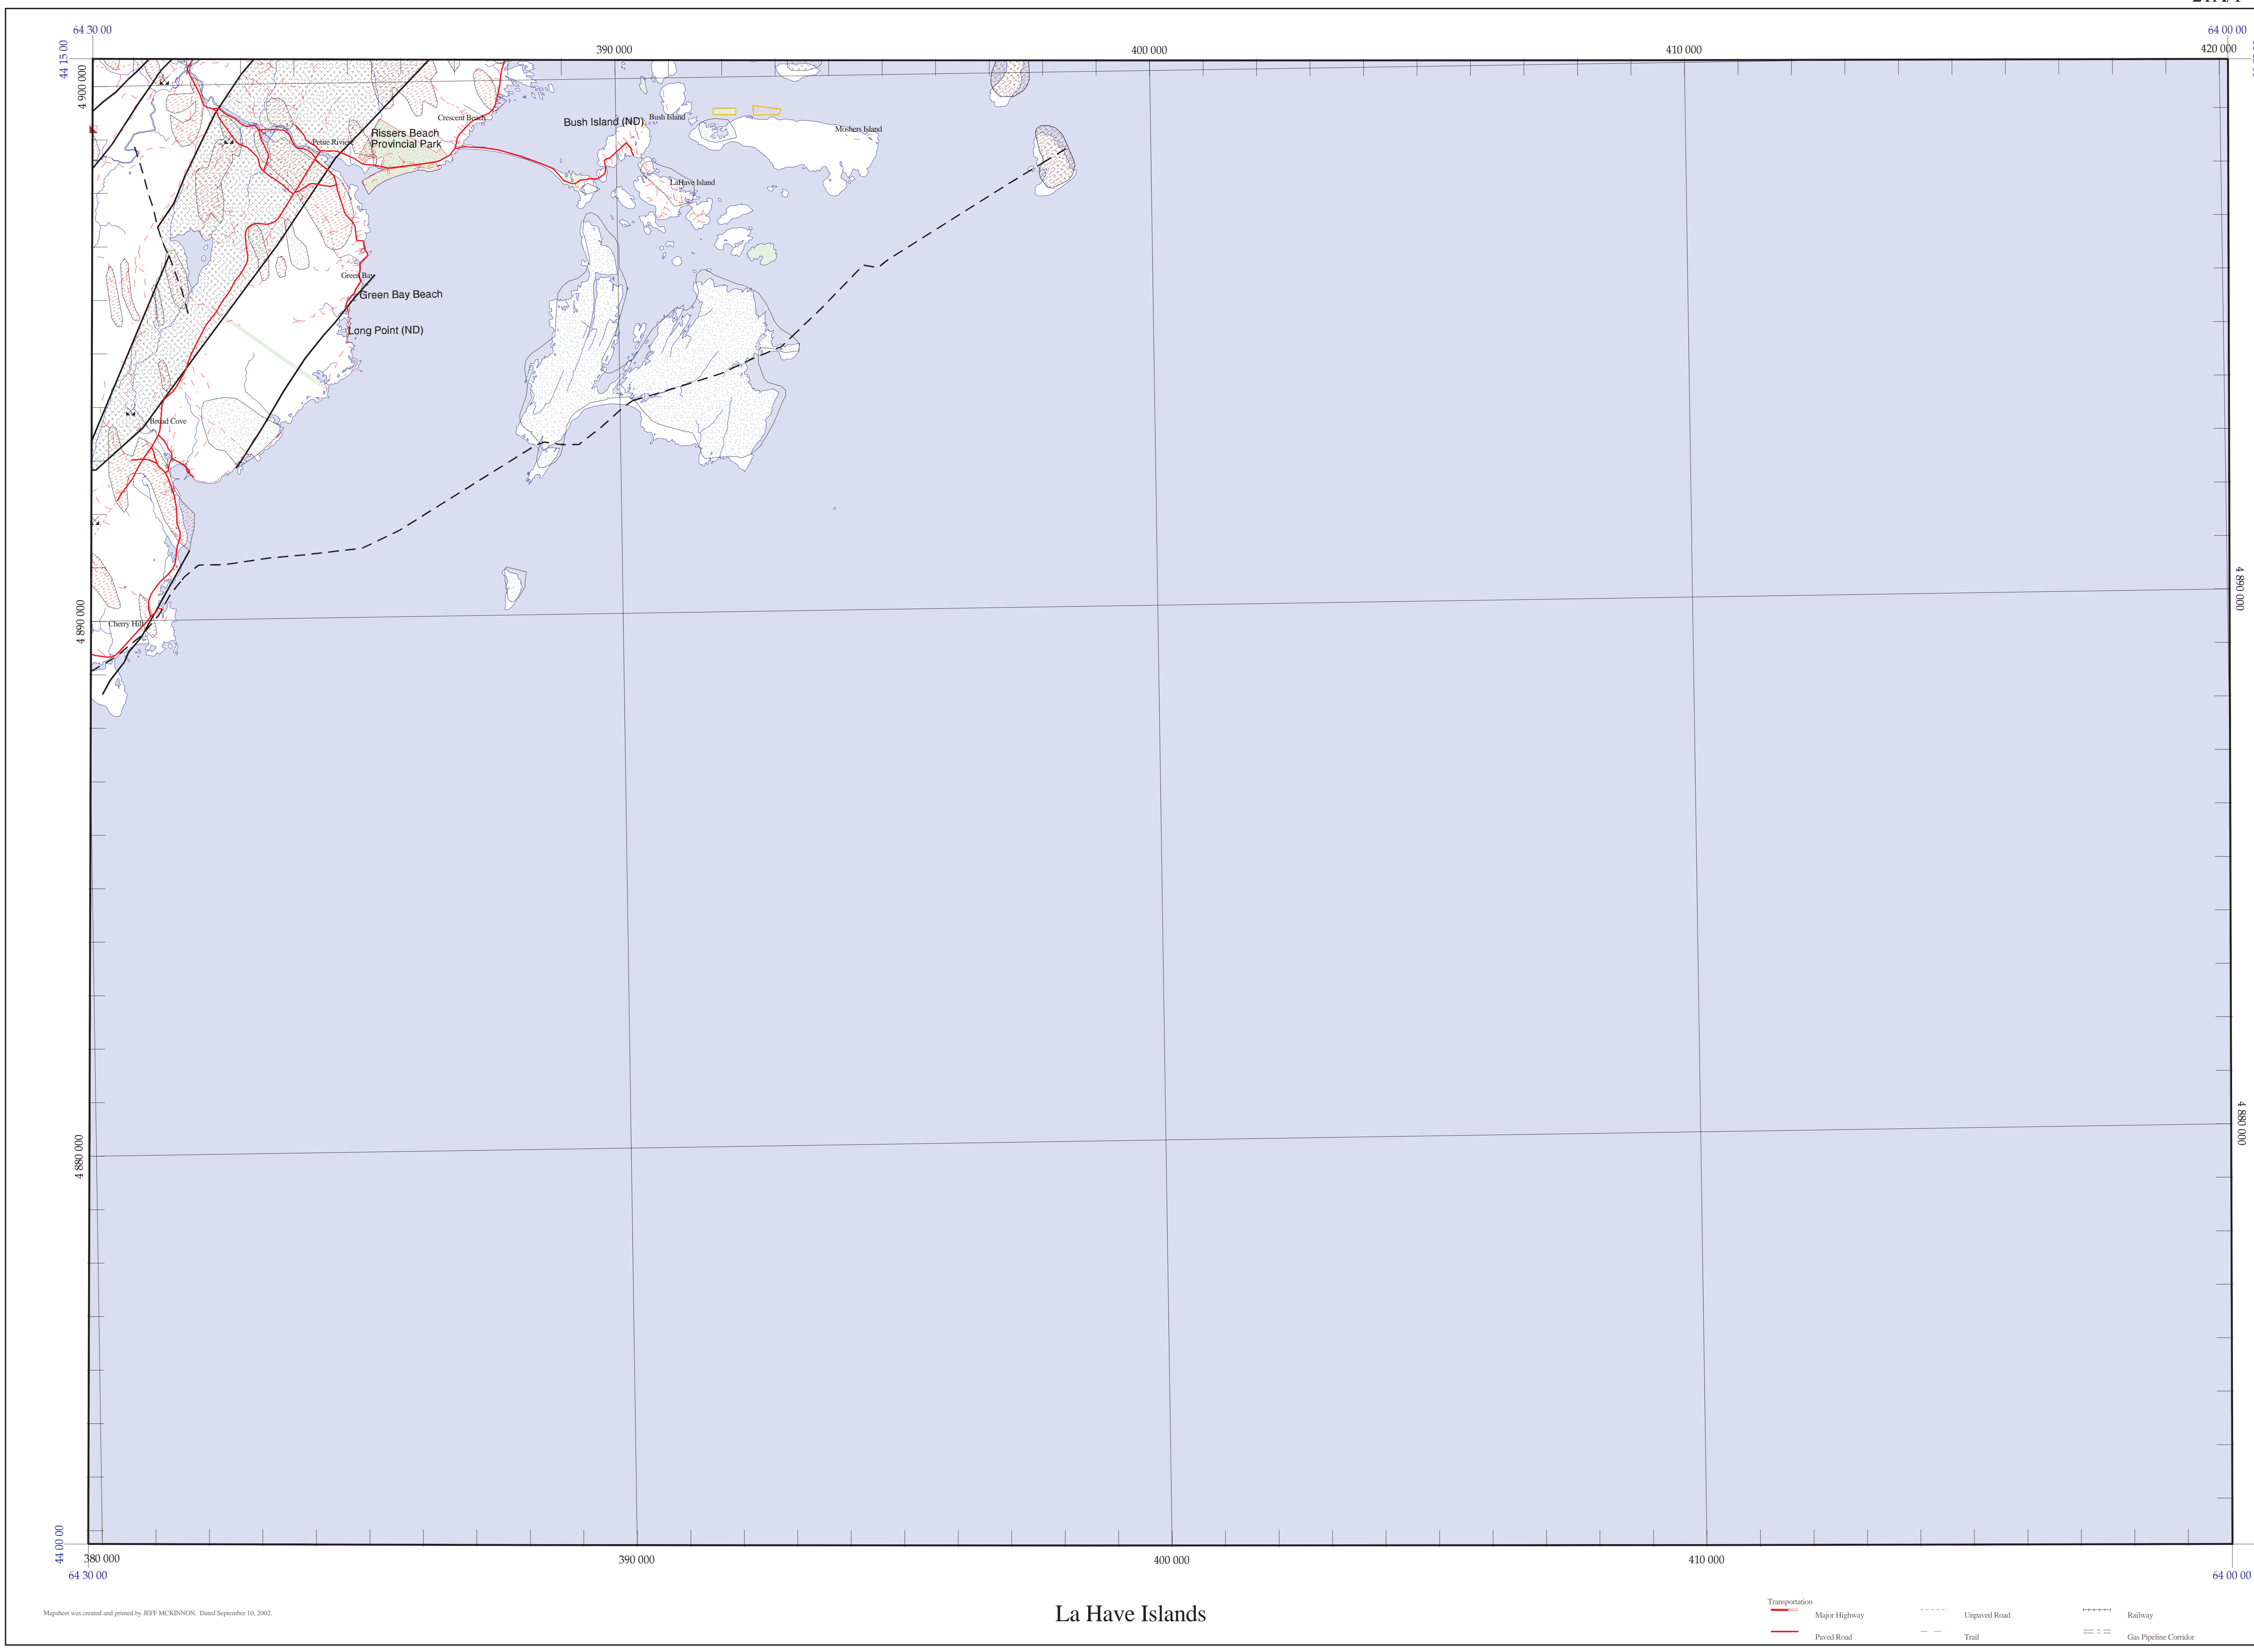

Table with 2 columns: GEOLOGY FOR LAND-USE / ENVIRONMENTAL PLANNING and LAND DESIGNATION AND ACCESS. Includes symbols and descriptions for items like Potential Karst Area, Protected Area, Exposed Bedrock/Thin Till Cover, Drumlin, Flood Risk Area, Limited Access Area, Water Supply Watershed Intake, Water Supply Well, General Access Area, and Privately Owned Land.
