

**Map Notes**

GIS databases, cartography and reproduction by Angie Barras, David Haggard and Jeff McInnon of the Nova Scotia Department of Natural Resources, Geoscience Information Services Section, 2012-2017. The GIS database and map were developed using ArcGIS 10.2.2.

Universal Transverse Mercator Projection (UTM), Zone 20, Central Meridian 63°00' West, North American Datum (NAD) 1983 Canadian Spatial Reference System (CRS) 98.

Base and digital data derived from the Nova Scotia Topographic Database (NSTDB). Copyright © Her Majesty the Queen in Right of the Province of Nova Scotia. NSTDB is a service provided by the Nova Scotia Geomatics Services, Nova Scotia Geomatics Centre (NSGC), Amherst, Nova Scotia.

Shaded relief image derived from a 25m Digital Elevation Model of the Province of Nova Scotia, DP ME 56, version 2, 2008, Azimuth of 315°, sun angle of 45° and a vertical exaggeration of 5.

In compiling the maps and legend, unit names and ages were taken mainly from the source references, with no attempt to reconcile that information across Cape Breton Island, to remove duplicate names, or to re-interpret areas of geological inconsistencies that are not the work of the compilers.

Acknowledgments

Most of the geological information on this map area was compiled from work by White and Barr (1999a) and O'Neill et al. (2010). Full reference information for those publications, as well as others used in map compilation, is available in the accompanying open file report. Karen Johnson, Daniel MacIsaac and Christopher O'Neill provided field data and supervision for the 1:50 000 scale orthophoto base maps. We thank Angie Barras, David Haggard and Jeff McInnon for their help in producing these maps and the associated database. Sandra Barr acknowledges the long-term support of the Natural Sciences and Engineering Research Council of Canada and her employer, Acadia University. We thank Rob Riedel for reviewing the maps and providing many helpful comments.
