

LEGEND*		
Legend Key	Unit Terrene or Assemblage Code:	Unit name
DC - ECWcc - Carrolls Corner Formation	DC - Late Devonian, Carboniferous & Mesozoic	AT - Aspy Terrane
DC - LCCPH-c - Collindale Member	BT - Bras d'Or Terrane	BR - Blair River Inlier
DC - LCCPH-m - Margaree Member	CP - Cape Porcupine Complex	
DC - MCmp - Pomquet Formation		
DC - ECWhi - Hood Island Formation		
DC - ECWum - Upper Middle Windsor Group (undivided)		

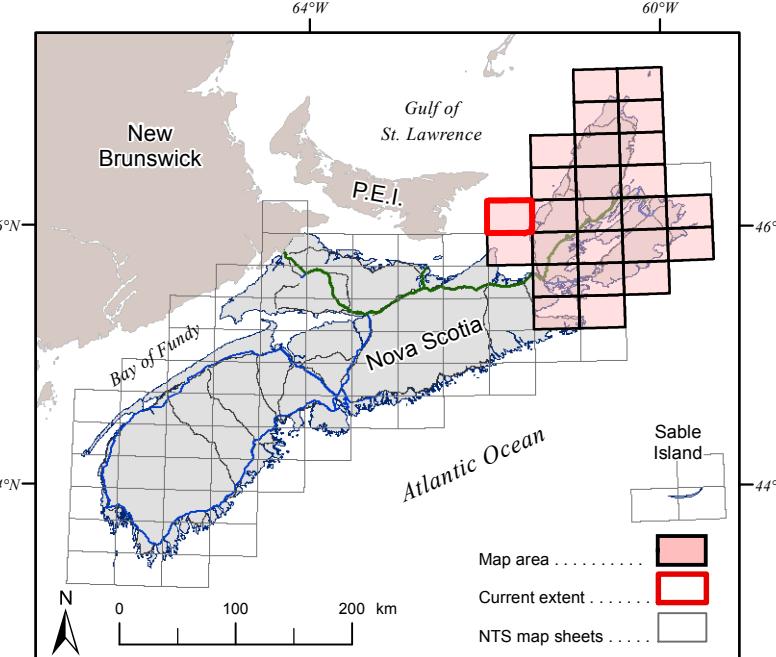

DC - LCChi - Henry Island Formation  
DC - LCCPH-c - Collindale Member  
DC - LCCPH-m - Margaree Member  
DC - MCmp - Pomquet Formation  
DC - ECWhi - Hood Island Formation  
DC - ECWum - Upper Middle Windsor Group (undivided)

\* Note: For full unit description and terrane information, please refer to the detailed legend for the Cape Breton Compilation Project - Open File Illustration ME 2017-001

#### Symbols\*\*

\*\* Note: Compiled symbols list for Open File Maps ME 2017-007 to 2017-031. All symbols may not appear on each map.

#### Map Notes

GIS databases, cartography and reproduction by Angie Barnes, David Haggard and Jeff McKinnon of the Nova Scotia Department of Natural Resources, Geoscience Information Services Section, 2012-2017. The GIS database and map were developed using ArcGIS 10.2.2.

Universal Transverse Mercator Projection (UTM), Zone 20, Central Meridian 63°00' West, North American Datum (NAD) 1983 Canadian Spatial Reference System (CRS) 98. Base and digital data derived from the Nova Scotia Topographic Database (NSTDB). Copyright © Majestech Inc. in Right of the Province of Nova Scotia. NSTDB data is derived from the Department of Natural Resources, Nova Scotia Geomatics Centre (NSGC), Amherst, Nova Scotia.

Shaded relief image derived from a 25 m Digital Elevation Model of the Province of Nova Scotia, DP ME 56, version 2, 2008. Azimuth of 315°, sun angle of 45° and a vertical exaggeration of 5.

In compiling the maps and legend, unit names and ages were taken mainly from the source references, with no attempt to reconcile that information across Cape Breton Island, to remove duplicate names, or to re-interpret areas of geological inconsistencies that are not the work of the compilers.

#### Acknowledgments

Most of the geological information on this map sheet was compiled from work by Giles et al. (1992a). Full reference information for those publications, as well as others used in map compilation, is available in the accompanying open file report. Karen Johnson, Dallas MacLean and Christa Pufahl did much of the digitizing and line drawing for this 1:50 000 scale geological map. Thanks to Angie Barnes, David Haggard and Jeff McKinnon for their help in producing these maps and the associated database. Sandra Barr acknowledges the long-term support of the Natural Sciences and Engineering Research Council of Canada and her employer, Acadia University. We thank Roz Ranside for reviewing the maps and providing many helpful comments.
