**LEGEND\***

Legend Key	
Code	Unit label
DC	Unit name
DC - ECWcc	Carrolls Corner Formation
DC - ECWu	Windus Group (undivided)
DC - ECHu	Horton Group (undivided)
DC - ECHa	Ainslie Formation
DC - ECHs	Strathlorne Formation
DC - ECHc	Craigish Formation
DC - LDc	Lowland Cove Formation
AT - LDam	Andrews Mountain Granite
AT - LDbbg	Black Brook Granitic Suite
AT - LDgag	Grand Anse Granite
AT - LDmag	Margaree Pluton
AT - LDpb	Pleasant Bay Pluton
AT - LDws	Wilkie Sugarloaf Granite
AT - SDgbm	George Brook Amphibolite
AT - Sgb	Glasgow Brook Pluton
AT - Sma	Middle Aspy River Orthogneiss
AT - SCLpg	Chéticamp Lake Gneiss - paragneiss
AT - SCLgn	Chéticamp Lake Gneiss - gneiss
AT - OSPmu	Money Point Group (undivided)
AT - OSPBmm	Mackenzies Mountain Orthogneiss
AT - CJSbc	Corey Brook Formation
AT - CJBfc	Fishing Cove River Formation
AT - nPSChu	Cape North Group (undivided)
AT - nPSChmb	Macgregor Brook Formation - marble
AT - nPSChmbq	Macgregor Brook Formation - quartzite
BR - Ssb	Sammys Barren Granite
BR - Srr	Red Ravine Syenite
BR - Sfb	Fox Back Ridge Diorite
BR - nPPfm	Meat Cove Marble
BR - mPPPbr	Blair River Inlier Mylonite
BR - nPob	Otter Brook Gneiss
BR - mPug	Upper Grays Hollow Brook Charnockite
BR - mPib	Lowland Brook Syenite
BR - mPnc	High Capes Anorthosite

**Symbols\*\***

Outcrop, float	•	Rock in water
Drillhole (after O'Neill et al., 2016)	●	Trans Canada highway
Mineral occurrence (modified after O'Reilly et al., 2016)	○	Arterial highway (CT - Cabot Trail, Hwy 30)
(Ag - silver; Au - gold; Cu - copper; Cr - chrome; Mn - manganese; Ni - nickel; Pb - lead; Pt - platinum; Mo - molybdenum; Ms - muscovite; Fe - iron; Fe - graphite; Co - cobalt; DIA - diabase; DOL - dolomite; F - fluorine; Fe - iron; GR - graphite; Gp - gneiss; H - hornfels; L - leucosome; M - mafic; P - plagioclase; U - uranium; W - tungsten; Zn - zinc)	+	Collector highway
Bedding: tops known (inclined, vertical, overstepped)	+	Local road
Bedding: tops unknown (inclined, vertical)	+	Seasonal, restricted or private road
Fold axis (axis was unknown, a fold z fold)	↔	Trail, track
Fold (inclined, vertical)	↔	Railway (active, inactive)
Intersection lineation	↔	River, stream
Mineral lineation	↔	Boundary (county, inter-provincial)
Geological contact	—	Transmission line
Fault	—	Cape Breton Highlands National Park
Thrust fault	—	Wetlands
Major coal seam (after Henrich and Caster, 2017)	—	Dam
Area of concentrated drilling	—	Lake, ocean

\*\* Note: Compiled symbols list for Open File Maps ME 2017-007 to 2017-031. All symbols may not appear on each map.

**Acknowledgments**

Most of the geological information on this map sheet was compiled from work by Barr et al. (1992), Currie (1993), Jamieson et al. (1993), Macdonald and Smith (1981), Miller (1997), Pint (1987) and Yawneydohin (1989). Full report information for the publications, as well as other work in map compilation, is available in the accompanying reports. Karen Stevenson, Dallas MacIsaac and Christa Pufahl did much of the digitizing of original field data. Rob Raisie provided much of the original field data. We thank Angie Barnes, David Haggard and Jeff McRae for their help in producing these maps and the Nova Scotia Geoscience Information Services Section for the support of the Natural Sciences and Engineering Research Council of Canada and her employer, Acadia University. We thank Rob Raisie for reviewing the maps and providing many helpful comments.
