

Nayarit Gold Inc.: Value and Vision

Colin Sutherland¹

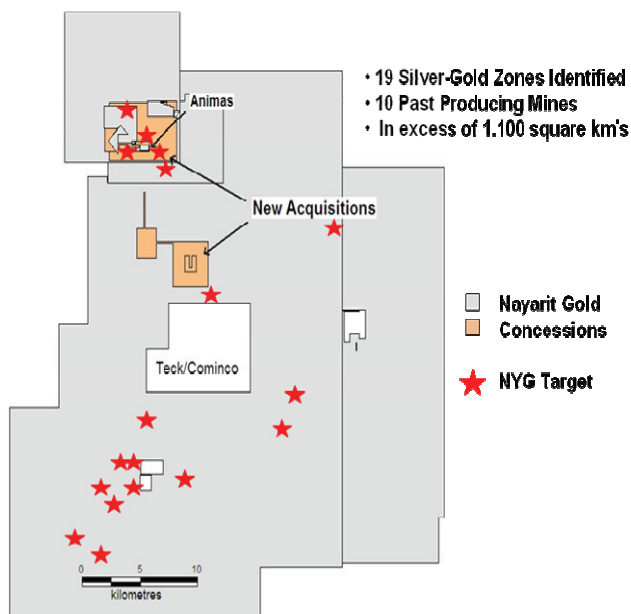

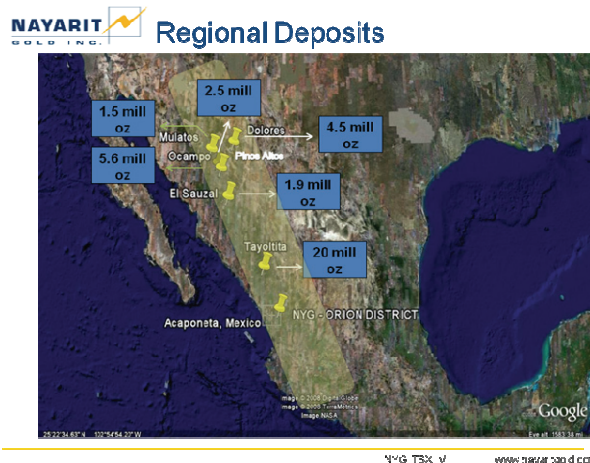

Nayarit Gold Inc. (TSXV:NYG) is a junior exploration company focused on the development of its Orion District in the State of Nayarit, Mexico. The company's land position encompasses 110 000 hectares of prospective ground including 19 gold-silver zones and 10 past-producing mines. The district is located along the Sierra Madre Occidental Trend, which hosts some of the largest gold/silver deposits in the world.

The Animas/Del Norte Discovery has been the focus of the company's drill program this year. Presently two drill rigs are turning at the Discovery. Drilling has been focused on the two sub-parallel quartz-breccia structures that trend east - west. These structures have been traced for about 800 m, and extend on to the newly acquired concessions providing for an approximate strike length of 4 km.

Nayarit Gold Inc.'s goal is to produce a 43-101 Resource calculation by Q2/2009, and is targeting one million gold equivalent ounces. The company's drill program to date has been highly successful. The drill results continue to extend the mineralized zone at Orion along strike to the east. The results continue to exhibit very positive grades and width, and the upper part of the mineralized zone demonstrates bulk tonnage potential.

Nayarit Gold Inc.'s management team consists of individuals with a proven track record of success in exploration, development and production. Along with an experienced management team, the company is well financed and recently raised \$10 million with the Bank of Montreal in a very challenging economic environment.
