

**Environmental Protection Zone**  
Includes an area of a park that is highly sensitive or contains significant natural or historic resources that require protection. Permitted uses include interpretive, educational and scientific activities where these activities do not conflict with the underlying protection objective.

**Resource Conservation Zone**  
Contains significant natural, cultural or recreational features and landscapes that require a high standard of conservation. Permitted activities are those which do not conflict with the inherent natural character and aesthetic qualities of the park resource base.

**Recreation Development Zone**  
Includes an area of a park that is capable of supporting the development of facilities and services associated with a wide range of outdoor recreational activities.
