

Pearl Island Wildlife Management Area

This wildlife management area consists of Pearl Island, a 12.4 hectare privately owned island, and the water within half a mile of the island. Total area is 317.8 hectares. The island is a rock barren. In 1976 it became a wildlife management area with the support of the Nova Scotia Bird Society. The wildlife management area was created for the protection of colonial nesting birds. Hunting and trapping are prohibited.
