

CORPORATE OVERVIEW

Founded in Dartmouth, Nova Scotia in 1993 as a distributor of specialty and commodity chemicals to various industries. Alpha Chemical quickly forged strategic alliances with major national and international manufacturers to become a full line chemical distributor in Canada.

Company founder and President, Eric Efford, has an established track record having spent 25 years working in Canada's Chemical distribution industry. Alpha has experience in all major industries and developed products, which are cost beneficial to a best value for its customers, Alpha is committed to provide the level of service required to meet the high standards necessary in today's industry.

In 1999, Alpha expanded its services and now operates a manufacturing/blending and repackaging facility in Dartmouth, Nova Scotia. The facility is strategically located in the Burnside Industrial Park to better serve key industrial centers within North America and Europe. Focusing on specialty and industrial chemicals tailored to meet customer requirements having distribution capabilities within North America. Out rigid quality control specifications on all raw materials and finished goods ensure that our products meet customer demands for excellence and quality.

Alpha's management team, with over four decades of related experience, is ready to work on our customer's most complex challenges.

Our commitment to quality is based on the principal to meet our customers' needs and expectations with quality products at competitive prices, delivered on time, within an Eco System Conscious Environment.

CORPORATE MISSION STATEMENT

Alpha is committed to providing quality products. Through technical, value-added services and strong alliances to meet and exceed our customer's needs and supplier's expectations, we maintain the highest standards of responsible manufacturing and distribution in an Eco System Conscious Environment.
