

CORPORATE HEALTH & SAFETY POLICY

1. The health and safety of employees are of paramount importance in the conduct of all our business relationships and include our suppliers, customers and our community.
2. Risks inherent in all operations must be managed to prevent occupational injuries and illness.
3. Management shall provide a safe working environment with proper equipment and safety training programs.
4. To comply with health and safety legislation and to establish rules and procedures is everyone's responsibility. It is management's expectation that we follow a "safety first" code of practice.

We expect excellence in health and safety performance and active participation of all employees.
