

SECTION 7.0

EMERGENCY RESPONSE PLAN

NOTE:

This is our current site emergency response plan that will be modified for the new facility based on the input from both the Department of Environment and the local Fire Emergency Services. Consultation with the local emergency services in development of our plan will ensure all parties responding to an emergency are aware of the site-specific hazards and emergency measures. This plan will be developed based on the site specific hazards and means of minimizing damage to people and the environment in the case of an emergency.
