3) Please provide your comments or feedback on the Project:

As a lifetime resident, I love seeing projects with these sort of spinoffs. Loads of jobs and opportunities while helping to move to a greener tomorrow for my kids. Growing up here, it was a bit bleak for a minute. Job opportunities forced many to move elsewhere but we have seen an influx as of late moving "back home" and Everwind projects.

3) Please provide your comments or feedback on the Project:

This project is a major undertaking for Guysborough County. A 17 million dollar revenue is nothing to sneeze at. However, at what cost to the County ie ecosystem, tourism, and more to Guysborough County marketing strategies.

The presentation was outstanding, as well as the knowledgeable presenters.

Please return survey to a Project team member or email to guysboroughwind@everwind.ca

EVERWIND

FUELS

I think that the presentations should be in communities that this project will have an impact ie. Lamp River, Mulgrave etc.

The names of the farms should be mirrored around these communities name or named after a certain quality of the area.

I would love to see it go.

I am concerned about turbines going in the Strait because it will impact large ships from passing through. If this is not going in the water, will they be using more lands to compensate?

1 Thanks for telling me how you
ruining our community

3) Please provide your comments or feedback on the Project:

Building wind farms so a large corporation
can benefit and not Nova Scotians from
energy being produced is corporate greed. The
Impact to this area is immense. Large
concrete platforms and the sheer # is absurd.
This is not "green energy" and I'm tired of
people saying it is. How can this people
sleep at night. Big Corporations don't care

*Concerning your ongoing layout work:
No matter what your extensive studies are, there
will definitely be constraints impacting the
environment and humans (health risks).
I can't imagine the 'hum' of the collective
sound of these turbines in my backyard
24 hours/day.*

EVERWIND

FUELS

Europe - is a lot of energy lost (and used for transport) makes this project less than green in my eyes.

There is a bit of detriment to the communities where the farms will be placed and I don't think any amount of money can ameliorate that.

I also would like a clearer picture of the Carbon Foot print of the materials and construction of the turbines, and the cost of decommissioning.

What happens to turbine materials that can't be recycled?

I have many concerns about so much land in MOD b being used for this purpose

Open House Exit Survey - St. Francis Harbour

1) How did you hear about this event? (i.e. got an email about this, heard from neighbour, municipal or county councillor, advertisement, website, social media, traditional media in paper or on radio):

Heard from concerned neighbours

2) How helpful was the information you received? Please indicate by circling a number below:

(Not at all helpful)

1

2

3

4

5

(Very helpful)

3) Please provide your comments or feedback on the Project:

The information received at the event was not helpful at all. All facts shared may of been true, but very biased. The cons to Everwind fuels & wind turbines outweigh any benefits that may occur. It is extremely concerning for those who live in this area. Wind turbines should not be placed so close to civilization. It wins rural Guysborough Countys aesthetic, wilderness & much more.

EVERWIND

FUELS

As a student in my fourth year at Dalhousie, I have taken a wide variety of courses on sustainability, chemistry & agriculture. One common thing these classes have taught me is how harmful ammonia is to the environment. For something advertised as a "green solution" this most certainly is not. It is unfair for residents of Guysborough county to be exposed to both the unpleasant wind turbines as well as the later exposure to ammonia. Wind turbines can create audible noise disturbance to those living around them, as well as low frequency noises & vibrations. The low frequency noises can lead to health hazards. In a 2023 report it was shown that many residents living nearby wind turbines face headaches, sleeping problems, ears ringing etc. I'm sure those who are developing this project would not want to live in an area like this. So why create this problem for other people? Find a different solution to being green.

3) Please provide your comments or feedback on the Project:

Good overall displays of the proposed project, outlining the different Phases; what is proposed (# of Turbines) for each area and the benefits to each Municipality (Taxes) as well as the Community Benefit to the area.

Mark was very helpful answering the questions and providing information on this project

I brought up the necessity of getting the Community Liason Committee organized. This I feel will

EVERWIND FUELS

give the folks in the affected area answers to their questions and hopefully the committee would be made up of those in favor of the project and those who may have concerns.

Bringing the communities on side at the very onset is crucial.

I am hearing from some folks in my District (3) of land owners who are excited about the possibility of getting some other financial resources from their properties by leasing their land for the turbines.

We are facing many thoughts today in our world of how to get our carbon imprint down to zero, so here we are in Guysborough; because of our location & natural resources (Crown Land) wind etc. in a great location to be part of this renewable energy project.

So we have to be up front with the residents, give them the answers that they may ask & make sure that the project is done in an environmental safe manner.

As councillor of District 3, I look forward in more information sessions as we see this project move forward.
