## Reference Documents

- Application submitted May 19, 2017 and attachments.

## 1. Definitions

- a. Act means Environment Act, Chapter 1 of the Acts of 1994-95, and includes, unless the context otherwise requires, all regulations made pursuant to the Act.
- b. Administrator means a person appointed by the Minister for the purpose of this Act, and includes an acting administrator.
- c. Approval means an Approval issued pursuant to this Act with respect to an activity.
- d. Department means the Department of Environment, and the contact for the Department for this approval is:  
Nova Scotia Environment  
Central Region, Truro Office  
36 Inglis Place  
Truro, Nova Scotia B2N 4B4  
  
Phone: (902) 893-5880  
Fax: (902) 893-0282
- e. Facility means the Application of Pesticide and associated works.

- f. Minister means the Minister of Environment and includes any person appointed as a designate of the Minister.
- g. Site means the location of the authorized work.

## **2. General**

- a. Adhere to the Nova Scotia Environment Act and Pesticide Regulations administered by Nova Scotia Environment.
- b. Ensure that all applicators/business operators are certified according to the Regulations.
- c. Adhere to all pertinent information outlined on the product labels.
- d. Strictly adhere to the terms and conditions of this Approval. Make all requests for changes or additions in writing to the Department office found herein.
- e. Do not apply pesticides when wind speeds exceed 10 km/hr. Follow label directions for allowable wind speeds if speeds less than 10 km/hr are quoted. When using the Radiarc sprayer, a single swath along all boundaries and buffer zones must be undertaken in wind speeds of 10 km/hr or less and the remainder may be treated in winds of up to 15 km/hr.
- f. When the application of a pesticide is underway; wind speed must be checked at 15 minute intervals during aerial application and 30 minute intervals during ground application. Should a wind speed reading exceed the maximum; a second reading shall be taken 10 minutes later and if it still exceeds the maximum; the application must cease. It will require 2 consecutive acceptable readings 10 minutes apart to restart the application. Records must be maintained of the time and results of all wind speed readings taken and be provided to the Department upon request.
- g. Make available this Approval or a copy thereof at the treatment site or loading/mixing site whenever the program is being undertaken.
- h. Adhere to the contingency plan on file with the Department during an uncontrolled release or other emergency involving pesticides. A copy of the plan must be at the treatment site or mixing/loading area at all times when the work is being undertaken.
- i. Store and maintain equipment and supplies at mixing/loading sites to localize/minimize any environmental impact of a uncontrolled pesticide release.
- j. Return daily reports to the Department no later than one month after the program completion.
- k. Ensure all non-returnable plastic pesticide containers are properly cleaned, rinsed, and taken to a recycling depot.

- l. Adhere to all other federal, provincial, and municipal laws, acts, and regulations applicable to the proposed activities. This would include the Nova Scotia Occupational Health and Safety Act.
- m. Provide Department staff with full cooperation during the execution of their duties associated with this program.
- n. If this work is being undertaken on land owned by a person other than the Approval Holder(s); written authorization to treat the property from the landowner must be forwarded to the Department before the work is undertaken. If this written authorization was submitted at the time of application for approval; it is not necessary to resubmit.

### **3. Specific Requirements**

- a. Should any treatment areas be within or in close proximity to municipal potable water supply areas, the Approval Holder must ensure that the “Criteria for Pesticide Applications in or near Municipal Water Supply Watersheds” restrictions are adhered to.

### **4. Operation**

- a. Protect all surface watercourses which are not located in municipal potable water supply watersheds with 30 m buffer zones.
- b. Do not apply pesticide within 60 m (measured horizontally) of a well or other source of domestic water.
- c. Use extreme caution when applying pesticide near wetlands to ensure that an adequate buffer zone is maintained.
- d. Maintain 100 m buffer zones around dwellings, businesses, schools, public buildings or other structures designated by an administrator during aerial spraying. Maintain 30 m buffer zones around dwellings, businesses, schools, public buildings or other structures designated by an administrator, during ground spraying. Dwellings or businesses owned by the Approval Holder(s) are exempt.
- e. Exercise extreme caution and maintain adequate buffer zones when applying pesticide near agricultural areas (e.g. hay fields, grain fields, blueberry fields, commercial and domestic vegetable gardens, etc.) or other sensitive areas.
- f. Maintain a 10 m buffer zone for any treatment site boundary that is also a property boundary. This buffer may be waived with written permission from the adjacent property owner.
- g. Ensure the boundaries and buffer zones are clearly defined.

### **5. Notification**

- a. Notify the Department at least two working days prior to spray commencement so that arrangements can be made to monitor the program. Continue to keep the Department up to date with the progress of the program as per a mutually acceptable arrangement.
- b. The Applicant(s) shall make all reasonable attempts to notify persons living in the vicinity of the treatment area who have requested pre-notification of when the application will be taking place.
