

# Chimney Corner Nature Reserve

**County**

Inverness

**Size**

731 ha

**Classification**

Nature Reserve

**Status**

New

**Conditions Apply?**

No

## Overview

Large forested patch representative of Dunvegan Fluted Hills natural landscape

## Ecological Values

Relatively undisturbed forest with unique topography

Transitional forest types from near-coast to more internal valleys

195 hectares of old growth forest

Steep forested slopes and ravines

## Outdoor Recreation Values

Rugged topography and proximity to Northumberland Strait make area a potential backcountry hiking destination

## Forestry Values

Dominated by mature hardwood and mixedwood stands

Portion of largest parcel unavailable for forestry due to DNR old forest policy

Steep slopes limit forestry potential on portion of this area

## Other Resource Values

Low mineral potential

High petroleum potential

Medium wind potential

## Conditions

### Exclusions and Vehicle Access

### Additional Comments

Coastal parcel contains right-of-way and access road to adjacent property
