

Scotian Basin Integration Atlas 2023

A collaborative study of stratigraphy, architecture,
evolution, and geologic prospectivity

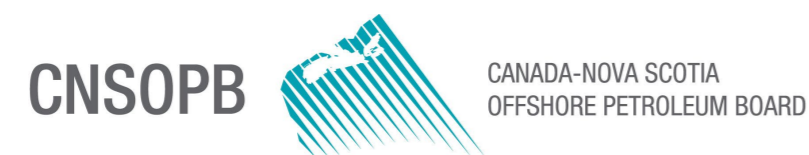

CERA

NOVA SCOTIA

BeicipFranlab 

ACKNOWLEDGEMENTS:

This project relies on contributions from many individuals from a variety of disciplines and organizations that are listed below.

Organisation	Contributors
Nova Scotia Department of Natural Resources and Renewables	Fraser Keppie, Natasha MacAdam, Christopher Sangster Adam MacDonald, Kim Doane
Advisors	Matt Luheshi, Janice Weston, Andrew Macrae, Andrew Bishop, Bill Richards, Martin Fowler
OERA	Russell Dmytriw
CNSOPB	Mark Deptuck, Kris Kendell, Carl Makrides
Beicip-Franlab	Christophe Bimont, Ingrid Breda-Dupin, Laurent Cuilhé, Stefan Doublet, Paul Jermannaud, Virginie Machault, Nicolas Mouchot, Jean-Marc Prévost, Djowan Thomas

Scotian Basin Integration Atlas 2023

A collaborative study of stratigraphy, architecture, evolution, and geologic prospectivity

Executive Summary

Acknowledgements

Table of Contents

Chapter 1	Introduction and Digital Database
Chapter 2	Scotian Basin Architecture, Source Rocks & Advanced Geophysics
	2.1 New Regional Seismic Interpretation
	2.2 Hydrocarbon Occurrences – Evidence for Charge Migration
	2.3 Jurassic Source Rocks – Synthesis and New Models
	2.4 Advanced Geophysics
Chapter 3	Sequence Stratigraphy and Gross Depositional Environments
	3.1 Geological and Geophysical Analysis
	3.2 Sequence Stratigraphy
	3.3 3D Seismic Geomorphology Analysis
	3.4 Gross Depositional Environment Mapping
Chapter 4	Basin Modeling
	4.1 Introduction
	4.2 3D Model Construction
	4.3 Source Rocks
	4.4 Thermal and Pressure Model
	4.5 Migration Model
Chapter 5	Common Risk Segment (CRS) Maps & Yet to Find
Chapter 6	Prospective Resources
Chapter 7	Conclusions and Future Work

Appendices

Appendix 1	2010-2020 Offshore Drilling Results
Appendix 2	Synthesis of Biostratigraphic Studies
Appendix 3	Geology and Geophysical Analysis (Paleoscan)
Appendix 4	Supporting Research Summaries
	4.1 Hydrocarbon Migration Study (NSDRR)
	4.2 Regional Reservoir Studies (NSDRR)
	4.3 Barrington 3D Seismic Reprocessing and Inversion (Western Geophysical)
	4.4 Synthesis and Critique of Lower Jurassic Hydrocarbon Charge Evidence, Offshore Nova Scotia (Stratum Reservoir)
	4.5 Organic Facies Prediction and Risking of Jurassic Source Rocks, Offshore Nova Scotia (GETECH)
	4.6 Tracking Mesozoic Paleoclimate Events on the Nova Scotia Margin (TNO)
	4.7 Paleogeography-to-Petroleum Systems: Research Innovations for Offshore Nova Scotia (ChronoSurveys)
	4.8 Palaeobathymetry and Tectonic Evolution of Lower Jurassic Source Rocks of the Conjugate Nova Scotia-Moroccan Margins (CERGY)
Appendix 5	Velocity Model Atlas
Appendix 6	Bibliography
Appendix 7	Upper Triassic-Lower Jurassic Central Atlantic Correlation
